"A talented writer with a gift for the absurd and a wicked take on life."--January Magazine "Barclay is the master."--The Wall Street Journal Newspaper writer, family man, and reluctant hero Zack Walker has stumbled onto some dicey stories before, but nothing like what he's about to uncover when a mutilated corpse is found at his father's lakeside fishing camp. While the locals attribute the death to a bear attack, Zack suspects something far more ominous--a predator whose weapons include arson, assault, and enough wacko beliefs to fuel a dozen hate groups. Then another body is discovered and a large supply of fertilizer goes missing, evoking memories of the Oklahoma City bombing. But it's when he learns that his neighbor is a classic Lone Wolf--FBI parlance for a solo fanatic hell-bent on using high body counts to make political statements--that Zack realizes the idyllic town of his childhood is under siege. The fuse is lit to a catastrophe of unimaginable terror. And with time running out, Zack must face off with a madman. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs--in companies of all sizes--a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in an age when companies need to innovate more than ever. Instead, she uses her sharp-edged humor to tackle the most difficult facet of aging: the mind's decline. Praise for Intangible Assets "In Intangible Assets, Jeffrey Cohen presents an informative, thought-provoking and practical look at an increasingly important component of every business's worth. He describes the art and science of identifying assets that have clear economic benefit, but are typically not found on the balance sheet, and he provides an invaluable framework within which the reader can value these assets, despite their elusive nature." --Rick Westervelt, President, Skylist, Inc. "Jeffrey Cohen's integrative approach to conceptual issues of intangible assets is creative and a refreshing contribution. He brings law, economics, finance, and accounting to the same table, which results in a comprehensive framework for understanding how value is created and sustained. His construct of 'proto-assets' and 'portfolio of intangible economic benefits' is key. Written in an easy-to-read style with many practical examples, this book will be useful for both novice and experienced professionals." --W. Dana Northcut, PhD, Adjunct Associate Professor of Accounting Graduate School of Business, University of Chicago Principal, Chicago Partners, LLC "This volume is the perfect resource for newcomers to IP valuation. Through lucid explanations and well-chosen illustrations, it does for the reader exactly what a valuation expert should do for a client--it makes the abstract concrete. But this volume is not just for the novice; it holds insights that will be useful to IP experts in law, accounting, and economics." --Edward F. Malone, Partner, Jenner & Block LLP
