Many SLA professionals remain unaware of what CL and Applied Cognitive Linguistics are and of the tremendous potential these approaches offer for our understanding of L2 learning and pedagogy. The volume addresses this gap by presenting theoretically-grounded, empirically-based studies which illustrate the application of key concepts of CL and demonstrate the efficacy of using the concepts in the classroom or in basic L2 research. Soon, Suee must confront a stunning secret that her shadow has been hiding under her own two feet—something very dark and sinister that could put Suee and her newfound friends at risk! The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk. Soul of the Samurai contains modern translations of three classic works of Zen & Bushido. In Soul of the Samurai, bestselling author and respected translator Thomas Cleary reveals the true essence of the Bushido code or Zen warrior teachings according to 17th-century Japanese samurai master Yagyu Munenori and his Zen teacher Takuan Soho. The three works of Zen & Bushido translated in Soul of the Samurai are: The Book of the Sword by Yagyu Munenori The Inscrutable Subtlety of Immovable Wisdom by Takuan Soho The Peerless Sword by Takuan Soho Yagyu was a renowned swordsman and chief of the Shogun's secret police, while Takuan was the Zen spiritual mentor to the Emperor. This samurai philosophy book contains the first English translations of their seminal writings on Bushido. Cleary not only provides clear and readable translations but comprehensive notes introducing the social, political, and organizational principles that defined samurai culture—their loyalty to family, their sense of service and duty, and their political strategies for dealing with allies and enemies. These writings introduce the reader to the authentic world of Zen culture and the secrets behind the samurai's success—being "in the moment" and freeing the mind from all distractions, allowing you to react instantaneously and instinctively without thinking. In these classic works we learn that Zen mental control and meditational training were as important to the Samurai as swordsmanship and fighting skills. More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence. "This book provides theoretical frameworks and empirical research findings to assist managers, academics and consultants gain a thorough understanding of intellectual capital and social capital as a base for improving their tasks"--Provided by publisher. This book explores different emergent spaces where diverse urbanites spontaneously negotiate, make and remake urban spaces, create opportunities, produce social change, challenge urban life, culture, and politics, or simply ask for their right to the city. The focus of this book is on spaces and contexts where change is seeded, regardless of whether it was planned and whether it was or will be successful in the end. Contributors analyze the seeds of change at their very inception in diverse cultural contexts across four continents. How do small groups of ordinary and often also disenfranchised people design, suggest and implement ideas of change? How do they use and remake small urban spaces to better suit their purposes, voice claims to the city, create opportunities, and design better urban lives and futures? The emphasis of this volume is not on the nature of activities and change, but on the minute processes of initiating change. More than half of the world's farmers are women. They are the majority of the poor, the uneducated and are the first to suffer from drought and famine. Yet their subordination is reinforced by well-meaning development policies that perpetuate social inequalities. During the 1975-85 United Nations Decade for the Advancement of Women their position actually worsened. This book analyses three decades of policies towards Third World women. Focusing on global economic and political crises - debt, famine, militarization, fundamentalism - the authors show how women's moves to organize effective strategies for basic survival are central to an understanding of the development process. El turismo de masas moderno no es una desagradable consecuencia de la sociedad capitalista, sino una oportunidad para que la gente busque su felicidad. No es mayormente una relación entre extranjeros y locales, ya que el turismo doméstico es más importante que el internacional en casi todos los países. Tampoco es primordialmente un nexo entre sociedades ricas y sociedades pobres, dado que los flujos turísticos comunican a unos países desarrollados con otros. Está lejos de ser una conspiración para mantener la hegemonía cultural de los países ricos. Muchos otros la aceptan sencillamente porque prefieren los servicios que ofrece el mercado y se gastan libremente en ellos su renta disponible. Finalmente, el turismo no es la mayor fuerza globalizadora y sus efectos culturales palidecen ante los de otros medios de comunicación como la televisión o Internet. El turismo de masas solo puede considerarse insostenible por quienes creen que sostenibilidad equivale a desaparición del capitalismo y del mercado. Muchas de las propuestas para mitigar el cambio climático, que suelen equipararse con sostenibilidad, son exageradas y originarían gastos, estos sí, insostenibles. En suma, antes de desahuciar al turismo de masas, es menester poner en duda la arrogancia de la sabiduría académica y el autor lo logra con un gran despliegue de datos, sentido crítico y buen humor. This new edition of Daniel J. Velleman's successful textbook contains over 200 new exercises, selected solutions, and an introduction to Proof Designer software. The Verbal Behavior (VB) approach is a form of Applied Behavior Analysis (ABA), that is based on B.F. Skinner's analysis of verbal behavior and works particularly well with children with minimal or no speech abilities. In this book Dr. Mary Lynch Barbera draws on her own experiences as a Board Certified Behavior Analyst and also

as a parent of a child with autism to explain VB and how to use it. This step-by-step guide provides an abundance of information about how to help children develop better language and speaking skills, and also explains how to teach non-vocal children to use sign language. An entire chapter focuses on ways to reduce problem behavior, and there is also useful information on teaching toileting and other important self-help skills, that would benefit any child. This book will enable parents and professionals unfamiliar with the principles of ABA and VB to get started immediately using the Verbal Behavior approach to teach children with autism and related disorders. Originally published in 1993, this book contains 3 studies from Latin America: Mexico, Puerto Rico and Venezuela. These studies bring out sharply the processes at work in Latin America between 1950 and 1980, which were responsible for the crisis that the continent faced in the 1980s. In each case there was a striking failure in building up national technological capability so that the country could grapple with the problems it faced. A concept-driven and assessment-focused approach to Spanish teaching and learning. - Approaches each chapter with statements of inquiry framed by key and related concepts, set in a global context - Supports every aspect of assessment using tasks designed by an experienced MYP educator - Differentiates and extends learning with research projects and interdisciplinary opportunities - Applies global contexts in meaningful ways to offer an MYP Spanish programme with an internationally-minded perspective

Despite the decline in the number of military coups since the 1960s and 1970s, Militaries continue to be crucial political actors in many world regions. Their impact on the democratic development of nations, however, has been mixed. On the one hand, coups against democratically elected leaders in Mali (2012), Egypt (2013), and Thailand (2014) have spelled doom for these countries’ nascent democratic regimes and have ushered in new periods of military dominance in politics. The cases of Portugal (1974), the Philippines (1986), and Tunisia (2011), on the other hand, show that the military’s decision not to defend authoritarian leaders against mass protests contributed crucially to the fall of dictatorships and facilitated transitions to democracy. This volume addresses the military’s ambivalent role as “midwife” or “gravedigger” of democracy and highlights the often multi-layered and complex relationship between militaries’ political behaviour and democratization. The chapters were originally published in a special issue of *Democratization*.

Ken Follett’s extraordinary historical epic, the *Century Trilogy*, reaches its sweeping, passionate conclusion. In *Fall of Giants* and *Winter of the World*, Ken Follett followed the fortunes of five international families—American, German, Russian, English, and Welsh—as they made their way through the twentieth century. Now they come to one of the most tumultuous eras of all: the 1960s through the 1980s, from civil rights, assassinations, mass political movements, and Vietnam to the Berlin Wall, the Cuban Missile Crisis, presidential impeachment, revolution—and rock and roll. East German teacher Rebecca Hoffmann discovers she’s been spied on by the Stasi for years and commits an impulsive act that will affect her family for the rest of their lives. . . . George Jakes, the child of a mixed-race couple, bypasses a corporate law career to join Robert F. Kennedy’s Justice Department and finds himself in the middle of not only the seminal events of the civil rights battle but a much more personal battle of his own. . . . Cameron Dewar, the grandson of a senator, jumps at the chance to do some official and unofficial espionage for a cause he believes in, only to discover that the world is a much more dangerous place than he’d imagined. . . . Dimka Dvorkin, a young aide to Nikita Khrushchev, becomes an agent both for good and for ill as the United States and the Soviet Union race to the brink of nuclear war, while his twin sister, Tanya, carves out a role that will take her from Moscow to Cuba to Prague to Warsaw—and into history. This open access book presents an ethical approach to utilizing personal medical data. It features essays that combine academic argument with practical application of ethical principles. The contributors are experts in ethics and law. They address the challenges in the re-use of medical data of the deceased on a voluntary basis. This pioneering study looks at the many factors involved when individuals and organizations wish to share information for research, policy-making, and humanitarian purposes. Today, it is easy to donate blood or even organs, but it is virtually impossible to donate one’s own medical data. This is seen as ethically unacceptable. Yet, data donation can greatly benefit the welfare of our societies. This collection provides timely interdisciplinary research on biomedical big data. Topics include the ethics of data donation, the legal and regulatory challenges, and the current and future collaborations. Readers will learn about the ethical and regulatory challenges associated with medical data donations. They will also better understand the special nature of using deceased data for research purposes with regard to ethical principles of autonomy, beneficence, and justice. In addition, the contributors identify the key governance issues of such a scheme. The essays also look at what we can learn in terms of best practice from existing medical data schemes. Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings. As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a “highest-priority” essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC. Best selling author Steven Erikson returns with the latest in the morbid history of the Malazan Empire In Northern Genabackis, a raiding party of savage tribal warriors descends from the mountains into the southern flatlands. Their intention is to wreak havoc amongst the despised lowlanders, but for the one named Karsa Orlong it marks the beginning of what will prove to be an extraordinary destiny. Some years later, it is the aftermath of the Chain of Dogs. Tavore, the Adjunct to the Empress, has arrived in the last remaining Malazan stronghold of Seven Cities. New to command, she must hone twelve thousand soldiers, mostly raw recruits but for a handful of veterans of Coltaine’s legendary march, into a force capable of challenging the massed hordes of Sha’ik’s Whirlwind who lie in wait in the heart of the Holy Desert. But waiting is never easy. The seer’s warlords are locked into a power struggle that threatens the very soul of the rebellion, while Sha’ik herself suffers, haunted by the knowledge of her nemesis: her own sister, Tavore. And so begins this awesome new chapter in Steven Erikson’s acclaimed Malazan *Book of the Fallen* . . . At the Publisher’s request, this title is being sold without Digital Rights Management Software (DRM) applied. Cardiovascular, respiratory, and related conditions cause more than 40 percent of all deaths globally, and their substantial burden is rising, particularly in low- and middle-income countries (LMICs). Their burden extends well beyond health effects to include significant economic and societal consequences. Most of these conditions are related, share risk factors, and have common control measures at the clinical, population, and policy levels. Lives can be extended and improved when these diseases are prevented, detected, and managed. This volume summarizes current knowledge and presents evidence-based interventions that are effective, cost-effective, and scalable in LMICs. Este libro contiene una propuesta de marco analítico para el conocimiento de la pobreza desde un enfoque de género a partir de la sistematización de hallazgos de

investigación contenidos en una amplia bibliografía producida con el objetivo de examinar, analizar y evaluar programas de apoyo productivo dirigidos a mujeres rurales, así como programas de transferencias condicionadas que han sido instrumentados por agencias de financiamiento de desarrollo y gobiernos de América Latina y el Caribe como mecanismos por excelencia para el combate a la pobreza en las últimas cuatro décadas. The essays included in this volume provide both an assessment of key areas and current trends in sociology, specifically with regard to contemporary sociology in Latin America, as well as a collection of innovative empirical studies. The volume serves as an effective bridge of communication allowing sociological academics to mobilize and disseminate research dynamics from Latin America to the rest of the world.
