Learning in the Fast Lane Apr 27 2022 "More than three million high-school students take five million Advanced Placement exams each May, yet remarkably little is known about how this sixty-year-old, privately-run program, has become one of U.S. education's greatest successes. From its mid-century origin as a tiny option for privileged kids from posh schools, AP has also emerged as a booster rocket into college for hundreds of thousands of disadvantaged youngsters. It challenges smart kids, affects school ratings, affords rewarding classroom challenges to great teachers, tunes up entire schools, and draws vast support from philanthropists, education reformers and policymakers. AP stands as America's foremost source of college-level academics for high school pupils. Praised for its rigor and integrity, more than 22,000 schools now offer some-or many-of its thirty-eight subjects, from Latin to calculus, art to computer science. But challenges abound today, as AP faces stiffening competition (especially dual credit), curriculum wars, charges of elitism, misgivings by elite schools and universities, and the arduous work of infusing rigor into schools that lack it and academic success into young people unaccustomed to it. In today's polarized climate, can Advanced Placement maintain its lofty standards and overcome the hostility, politics and despair that have sunk so many other bold education ventures? Advanced Placement: The Unsung Success Story of American Education is a unique account-richly documented and thoroughly readable-of the AP program in all its strengths and travails, written by two of America's most respected education analysts"--

Teaching and Learning Foreign Languages Oct 29 2019 Teaching and Learning Foreign Languages provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, Teaching and Learning Foreign Languages will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.

Examination Physical Education Feb 23 2022 In recent decades physical education has moved from the margins, redefining itself as an academic subject. An important component of this transformation has been the introduction of high-stakes examinations at key points in a student's school career and the emergence of 'examination physical education' as the dominant paradigm in many educational systems around the world. This book is the first to explore the growing international literature on examination physical education and draw on research to extend the political, academic and professional debates around the subject to explore its limitations and possibilities. Addressing key topics such as curriculum development, assessment methods, and teacher education, it seeks to assess how our existing knowledge of examination physical education can be best translated into pedagogical practice in the classroom. Complementing other texts in the Routledge Studies in Physical Education and Youth Sport Series, it makes an original and informed contribution to current discussions of physical education. Examination Physical Education: Policy, Practice and Possibilities is important reading for any student, researcher or teacher educator with an interest in physical education, sports pedagogy and education policy.

Remediation in Medical Education Apr 15 2021 Remediation in medical education is the act of facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators increasingly face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. Remediation in Medical Education: A Mid-Course Correction describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development.

Public Examinations Examined Nov 03 2022 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Information, Incentives, and Education Policy Jul 19 2021 How do we ensure that waste and inefficiency do not undermine the mission of publicly funded schools? Derek Neal writes that economists must analyze education policy in the same way they analyze other procurement problems. Insights from research on incentives and contracts in the private sector point to new approaches that could induce publicly funded educators to provide excellent education, even though taxpayers and parents cannot monitor what happens in the classroom. Information, Incentives, and Education Policy introduces readers to what economists know—and do not know—about the logjams created by misinformation and disincentives in education. Examining a range of policy agendas, from assessment-based accountability and centralized school assignments to charter schools and voucher systems, Neal demonstrates where these programs have been successful, where they have failed, and why. The details clearly matter: there is no quick-and-easy fix for education policy. By combining elements from various approaches, economists can help policy makers design optimal reforms. Information, Incentives, and Education Policy is organized to show readers how standard tools from economics research on information and incentives speak directly to some of the most crucial issues in education today. In addition to providing an overview of the pluses and minuses of particular programs, each chapter includes a series of exercises that allow students of economics to work through the mathematics for themselves or with an instructor's assistance. For those who wish to master the models and tools that economists of education should use in their work, there is no better resource available.

Secondary School English Education in Asia Jan 01 2020 Continuing on from the previously published Primary School English-Language Education in Asia: From Policy to Practice (Moon & Spolsky, 2012), this book compiles the proceedings which took place at the 2011 annual conference of AsiaTEFL which took place in Seoul, Korea. It surveys the current status, practices, challenges, and future directions of Secondary English education in 11 diverse countries - in Israel, Japan, Korea, Singapore, Bangladesh, India, Indonesia, Malaysia, Pakistan, Vietnam and China. Given the importance of secondary English education as the central feature for continuing development of target language and culture in English language teaching in Asia, each contributed chapter includes key policies, theories, and practices related to the development and implementation of country-specific curricular and instructional programs in secondary English educational contexts in these countries. Secondary School English Education in Asia: From Policy to Practice critically analyses both sides of the English language debate – from advantages to complications – in its chapters including: Educating for the 21st Century: The Singapore Experience Miles to Go ...: Secondary Level English Language Education in India English Language Education Innovation for the Vietnamese Secondary School: The Project 2020 Exploring the Value of ELT as a Secondary School Subject in China: A Multi-goal Model for English Curriculum Secondary School English Education in Asia will appeal to English Language Teaching (ELT) researchers, teacher educators, trainee teachers and teachers, primarily those teaching in Asia.

Learning from Shanghai Jan 13 2021 The Shanghai school system has attracted worldwide attention since its impressive performance in the Programme for International Student Assessment (PISA) in 2009. The system ranks as a 'stunning success' according to standards of the Organisation for Economic Co-operation and Development (OECD). Shanghai also stands out for having the world's highest percentage of 'resilient students' – students from socio-economically disadvantaged backgrounds who emerge as top performers. Learning From Shanghai: Lessons on Educational Success offers a close-up view of the people and the policies that have achieved such world-class performance. Based on research and personal observation gathered during the author's recent field work with school principals, teachers and students, this book explores the factors that explain Shanghai's exceptional success in education. The approach combines high standards of scholarly research and analysis with the author's unique personal insights, as evidenced by chapters entitled Education is Filling a Bucket and Lighting a Fire and Tiger Mothers, Dragon Children. Drawing on her experience as an education professional and a teacher of teachers, Charlene Tan thoroughly examines and analyzes the people, the policies and the practices that distinguish Shanghai educators. The contents include comprehensive details on the Shanghai approach to quality education, from discussion of the balance between centralization and decentralization, to school autonomy and accountability, to testing policy and professional development for teachers. The book includes detailed tables on curriculum and school performance targets, sample appraisal forms for teachers and students, and dozens of photographs. The author is an Associate Professor at the National Institute of Education, Nanyang Technological University, Singapore.
