Choice Reese almost had it all: a loving
relationship with Amy, an apartment in New
York City, a job she didn't hate. She had
scraped together what previous generations
of trans women could only dream of: a life of**

mundane, bourgeois comforts. The only thing missing was a child. But then her girlfriend, Amy, detransitioned and became Ames, and everything fell apart. Now Reese is caught in a self-destructive pattern: avoiding her loneliness by sleeping with married men. Ames isn't happy either. He thought detransitioning to live as a man would make life easier, but that decision cost him his relationship with Reese—and losing her meant losing his only family. Even though their romance is over, he longs to find a way back to her. When Ames's boss and lover, Katrina, reveals that she's pregnant with his baby—and that she's not sure whether she wants to keep it—Ames wonders if this is the chance he's been waiting for. Could the three of them form some kind of unconventional family—and raise the baby together? This provocative debut is about what happens at the emotional, messy, vulnerable corners of womanhood that platitudes and good intentions can't reach. Torrey Peters brilliantly and fearlessly navigates the most dangerous taboos around gender, sex, and relationships, gifting us a thrillingly original, witty, and deeply moving novel. Being a millennial is not easy. While the average millennial struggles with low remuneration and motivation, there

are others who become Instagram influencers and earn oodles of money and fame. This book aims to provide life hacks that can help millennials face the world professionally and personally. It discusses various topics along the lines of entrepreneurship, self-help, technological disruption and financial literacy. In this holistic guide for today's millennials, the author breaks down various day-to-day business concepts such as pricing, inflation, GDP and so on. The book also provides a glimpse of industries—FMCG, consulting, e-commerce, banking—to help readers understand the culture and demands of these industries. The book tries to speak to all kinds of millennials, be it the ones starting their slash careers or those beginning a new entrepreneurial venture. Hacks for Life and Career includes tips on managing difficult bosses and colleagues along with life hacks to upsell oneself in a corporate career. It also provides career-related assistance like creating an impactful resume and acing various rounds of job selection. The book answers the often-asked question of whether to pursue an Indian degree or an international degree. And finally, the secret sauce that will help them land that job with a nine-digit salary. The book will appeal to millennials who

are trying to make a career in corporate India. Based on tests conducted by Consumers Union, this guide rates new cars based on performance, handling, comfort, convenience, reliability, and fuel economy, and includes advice on options and safety statistics. Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. “Dr. Phil,” along with George Iny and the Editors of the Automobile Protection Association, pull no punches. An explosive exposé of Samsung that “reads like a dynastic thriller, rolling through three generations of family intrigue, embezzlement, bribery, corruption, prostitution, and other bad behavior” (The Wall Street Journal). LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD Based on years of reporting on Samsung for The Economist, The Wall Street Journal, and Time, from his base in South Korea, and his countless sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around

the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion-dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in Samsung Rising, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple's chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple's 80,000 and Google's 48,000). The company's revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea's exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company's

headlong attempt to overtake Apple at any cost. A sweeping insider account, Samsung Rising shows how a determined and fearless Asian competitor has become a force to be reckoned with. March 1993. Mumbai was rocked by a series of bomb blasts. Unknown to most, Dawood Ibrahim, the mastermind behind the terror attack, had made several calls to the CBI. The don was desperate to prove his 'innocence' by giving himself up, but with conditions. October 1999. The world's very first case of cricket match-fixing led to the banning of six top Indian cricketers, including the then team captain. It was only in 2013, after the then commissioner of police revived the case, that a charge sheet was filed in a court of law. January 2002. Aftab Ansari—a notorious Dubai-based don responsible for kidnapping a shoe baron in 2001 with the help of Jihadi groups in Pakistan—was arrested just as he was about to escape Dubai on a forged passport to Pakistan. All these cases of life-threatening moments and unbelievable relief, involved the sharp investigative skills of an Indian Police Service officer then serving in the CBI. In his thirty-seven years of service, Neeraj Kumar neutralized several terror modules and decimated insidious organized crime

syndicates spanning continents, working closely with Interpol, FBI, Scotland Yard and several national and international agencies. Much decorated and feted, he hung up his boots in 2013, after his last calling as Delhi's police commissioner. He has now decided that the inside details of what have been some of the most fascinating crime stories of our times must not go unheard and untold. The book covers several high-profile cases cracked by him in recent years, including the arrest and deportation of Aftab Ansari, the main accused in the shooting at the American Center in Kolkata, the nabbing of Jagtar Singh Tara, the man behind Punjab CM Beant Singh's assassination, and the arrest of Romesh Sharma, a Dawood henchman masquerading as a politician based in Delhi. Launched 35 years ago, the 2007 edition of the New Cars and Minivans has been restyled to present more current information in a user-friendly manner. This guide tells you when to buy, sell, or hold onto a vehicle and why price rarely guarantees reliability (beware of 'luxury lemons'). Hard-nosed ratings, true fuel-consumption figures, and which safety features are unsafe, are all found in this year's guide, as well as: Dealer markups for each model; cutting the freight fee The best

ColdFusion explores the development of
technology from Industrial Revolution to
Artificial Intelligence to figure out what's
next. As each new stage of technology builds
on the last, advancements start to progress at
an exponential rate. In order to know where
we're headed, it's essential to know how we
got here. What hidden stories lie behind the
technology we use today? What drove the
men and women who invented it? What were
those special moments that changed the
world forever? Dagogo Altraide explores these
questions in a history of human innovation
that reveals how new technologies influence
each other, how our modern world came to be,
and what future innovations might look like.
From the electric world of Tesla and the steam
engine revolution to the first computers, the
invention of the internet, and the rise of
artificial intelligence, New Thinking tells the
stories of the men and women who changed
our world with the power of new thought. The
Singularity. It is the era of the posthuman.
Artificial intelligences have surpassed the
limits of human intellect. Biotechnological**

beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form... India today is a vibrant free-market democracy, a nation well on its way to overcoming decades of widespread poverty. The nation's rise is one of the great international stories of the late twentieth century, and in India Unbound the acclaimed columnist Gurcharan Das offers a sweeping economic history of India from independence to the new millennium. Das shows how India's

policies after 1947 condemned the nation to a hobbled economy until 1991, when the government instituted sweeping reforms that paved the way for extraordinary growth. Das traces these developments and tells the stories of the major players from Nehru through today. As the former CEO of Proctor & Gamble India, Das offers a unique insider's perspective and he deftly interweaves memoir with history, creating a book that is at once vigorously analytical and vividly written. Impassioned, erudite, and eminently readable, India Unbound is a must for anyone interested in the global economy and its future. The long-awaited sixth installment in the Inspector Hal Challis series set in Australia, available in the United States at last! Hal Challis is in trouble at home and abroad: dressed down by the boss for speaking out about police budget cuts; missing his lover, Ellen Destry, who is overseas on a study tour. But there's plenty to keep his mind off his problems. A rapist in a police uniform stalks Challis's Peninsula beat, there is a serial armed robber headed in his direction and a home invasion that's a little too close to home. Not to mention a very clever, very mysterious female cat burglar who may or may not be planning something on Challis's patch. Meanwhile, at the Waterloo

Police Station, Challis finds his officers have their own issues. Scobie Sutton, still struggling with his wife's depression, seems to be headed for a career crisis; and something very interesting is going on between Constable Pam Murphy and Jeanne Schiff, the feisty young sergeant on assignment from the Sex Crimes Unit. From the New York Times bestselling author of My Share of the Task and Leaders, a manual for leaders looking to make their teams more adaptable, agile, and unified in the midst of change. When General Stanley McChrystal took command of the Joint Special Operations Task Force in 2004, he quickly realized that conventional military tactics were failing. Al Qaeda in Iraq was a decentralized network that could move quickly, strike ruthlessly, then seemingly vanish into the local population. The allied forces had a huge advantage in numbers, equipment, and training—but none of that seemed to matter. To defeat Al Qaeda, they would have to combine the power of the world's mightiest military with the agility of the world's most fearsome terrorist network. They would have to become a "team of teams"—faster, flatter, and more flexible than ever. In Team of Teams, McChrystal and his colleagues show

how the challenges they faced in Iraq can be relevant to countless businesses, nonprofits, and organizations today. In periods of unprecedented crisis, leaders need practical management practices that can scale to thousands of people—and fast. By giving small groups the freedom to experiment and share what they learn across the entire organization, teams can respond more quickly, communicate more freely, and make better and faster decisions. Drawing on compelling examples—from NASA to hospital emergency rooms—Team of Teams makes the case for merging the power of a large corporation with the agility of a small team to transform any organization. Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller Outliers, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that

isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller David and Goliath, Malcolm Gladwell has written a gripping guidebook for troubled times. "In 1994, from the Lacandon jungle, Zapatista Subcomandante Marcos replied to a ten-year-old girl in Mexico City who had sent him a drawing. In his response, Marcos conjured up a first fable introducing the beetle and knight-errant "Don Durito de la Lacandon." The ensuing output of Durito-related communiqués and tales comprise a broad discourse of the Zapatistas' struggle,

revealing their organizational history, their critique of traditional politics, and the reasons for their opposition to neoliberalism. These elements have helped make the Zapatistas an exemplary reference in the international movement against capitalist globalization. Conversations with Durito includes all the Durito stories issued to date, translated, annotated, and contextualized by the Accion Zapatista Editorial Collective, and illustrated by simpatico artists. Poetic, humorous, and imaginative, these fables provide an excellent introduction to the politics of globalization from the radical perspective of indigenous struggle."--Publisher's website. The bestselling author of No Logo shows how the global "free market" has exploited crises and shock for three decades, from Chile to Iraq In her groundbreaking reporting, Naomi Klein introduced the term "disaster capitalism." Whether covering Baghdad after the U.S. occupation, Sri Lanka in the wake of the tsunami, or New Orleans post-Katrina, she witnessed something remarkably similar. People still reeling from catastrophe were being hit again, this time with economic "shock treatment," losing their land and homes to rapid-fire corporate makeovers. The Shock Doctrine retells the story of the most

dominant ideology of our time, Milton Friedman's free market economic revolution. In contrast to the popular myth of this movement's peaceful global victory, Klein shows how it has exploited moments of shock and extreme violence in order to implement its economic policies in so many parts of the world from Latin America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years. For undergraduate and graduate courses in global marketing The excitement, challenges, and controversies of global marketing. Global Marketing reflects current issues and events while offering conceptual and analytical tools that will help students apply the 4Ps to global marketing. MyMarketingLab for Global Marketing is a total learning package. MyMarketingLab is an online homework, tutorial, and assessment program that truly engages students in

learning. It helps students better prepare for class, quizzes, and exams-resulting in better performance in the course-and provides educators a dynamic set of tools for gauging individual and class progress. Series 78, 79, 100 & 105 6 & 8-cylinder engines with 4.5L & 4.7L petrol and 4.2L diesel. What makes a reading experience »powerful«? This volume brings together literary scholars, linguists, and empirical researchers to elucidate the effects and reader responses to investigate just that. The thirteen contributions theorize this widely-used, but to date insufficiently studied notion, and provide insights into the therefore still mysterious-seeming power of literary fiction. The collection investigates a variety of stylistic as well as readerly and psychological features responsible for short- and long-term effects - topics of great interest to those interested or specialized in literary studies and narratology, (cognitive) stylistics, empirical literary studies and reader response theory. Text Completion & Sentence Equivalence GRE Strategy Guide provides a comprehensive approach to the vocabulary-based questions on the GRE. Learn core principles and useful techniques for taking cues from the given sentence, anticipating correct answers, and eliminating wrong

answers. Delving deeply into both of the GRE's vocabulary question types, this Guide provides straightforward step-by-step processes, detailed examples, and built-in exercises to hone particular skills. It is designed to ensure that, not only do you know the vocabulary being tested, but you can also use those words in context with ease and efficiency. Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways. How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of

as “rich” are actually a tiny minority of America’s truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, *The Millionaire Next Door* was a groundbreaking examination of America’s rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. “Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today’s earn-and-consume culture.” —Library Journal

***Ottawa’s Streetcars* was authored by Ottawa native Bill McKeown, after over fifty years of research. It details the history of the Ottawa Electric Railway, its predecessors, and the Ottawa Transportation Commission, all forerunners of today’s OC Transpo. The book contains 256 pages, with over 300 historical photographs in large size—larger than post-card size, for more interesting detail—with more than 40 photos in full colour. • Details the history of the Ottawa Electric Railway, its predecessors, and the Ottawa Transportation Commission. • A magnificent historical record of Ottawa as it was at the end of the 19th and**

during the first half of the 20th centuries. • A dozen appendices include coverage of the new O-Train, the restoration of OTC Streetcar 696, bibliography, trackage history, recollections from a retired motorman, and much more. • Ten city, trackage, and route maps including a large 1929 route map in full colour. • Extensively detailed 19-page roster of passenger and work equipment. “I must say that this is a most attractive book. In fact it is shaping up...as one of the best local streetcar histories I have ever seen. And as the onetime owner of Interurban Press, I published quite a few such books myself! The author has a lively writing style and shows diligent research. And that jacket - absolutely marvellous. Red is my favorite color for streetcars.” — G. Mac Sebree, Vancouver, Washington

How China Became Capitalist details the extraordinary, and often unanticipated, journey that China has taken over the past thirty five years in transforming itself from a closed agrarian socialist economy to an indomitable economic force in the international arena. The authors revitalise the debate around the rise of the Chinese economy through the use of primary sources, persuasively arguing that the reforms implemented by the Chinese leaders did not represent a concerted attempt to

create a capitalist economy, and that it was 'marginal revolutions' that introduced the market and entrepreneurship back to China. Lessons from the West were guided by the traditional Chinese principle of 'seeking truth from facts'. By turning to capitalism, China re-embraced her own cultural roots. How China Became Capitalist challenges received wisdom about the future of the Chinese economy, warning that while China has enormous potential for further growth, the future is clouded by the government's monopoly of ideas and power. Coase and Wang argue that the development of a market for ideas which has a long and revered tradition in China would be integral in bringing about the Chinese dream of social harmony. Having clear boundaries is essential to a healthy, balanced lifestyle. A boundary is a personal property line that marks those things for which we are responsible. In other words, boundaries define who we are and who we are not. Boundaries impact all areas of our lives: Physical boundaries help us determine who may touch us and under what circumstances -- Mental boundaries give us the freedom to have our own thoughts and opinions -- Emotional boundaries help us to deal with our own emotions and disengage from the

harmful, manipulative emotions of others -- Spiritual boundaries help us to distinguish God's will from our own and give us renewed awe for our Creator -- Often, Christians focus so much on being loving and unselfish that they forget their own limits and limitations. When confronted with their lack of boundaries, they ask: - Can I set limits and still be a loving person? - What are legitimate boundaries? - What if someone is upset or hurt by my boundaries? - How do I answer someone who wants my time, love, energy, or money? - Aren't boundaries selfish? - Why do I feel guilty or afraid when I consider setting boundaries? Dr. Henry Cloud and Dr. John Townsend offer biblically-based answers to these and other tough questions, showing us how to set healthy boundaries with our parents, spouses, children, friends, co-workers, and even ourselves. Intercultural competence and collaboration with individuals from diverse national origins are today important skills. This handbook comprehends an overall strategic concept for interculturality in corporations. The ability to communicate with people from diverse cultural backgrounds is becoming increasingly important. Many employers consider intercultural competence to be a key criterion

for selecting qualified candidates. The authors discuss practical approaches for intercultural trainings, methodology, and evaluation procedures based on current research. They explore the intercultural factor within corporations particularly as it relates to human resource development, negotiating, dealing with conflict, and project management. Thoughts on developing an overall strategy for interculturality round off this handbook. For readers of such crusading works of nonfiction as Katherine Boo's Beyond the Beautiful Forevers and Tracy Kidder's Mountains Beyond Mountains comes a powerful and captivating examination of two entwined global crises: environmental destruction and human trafficking—and an inspiring, bold plan for how we can solve them. A leading expert on modern-day slavery, Kevin Bales has traveled to some of the world's most dangerous places documenting and battling human trafficking. In the course of his reporting, Bales began to notice a pattern emerging: Where slavery existed, so did massive, unchecked environmental destruction. But why? Bales set off to find the answer in a fascinating and moving journey that took him into the lives of modern-day slaves and along a supply chain

that leads directly to the cellphones in our pockets. What he discovered is that even as it destroys individuals, families, and communities, new forms of slavery that proliferate in the world's lawless zones also pose a grave threat to the environment. Simply put, modern-day slavery is destroying the planet. The product of seven years of travel and research, Blood and Earth brings us dramatic stories from the world's most beautiful and tragic places, the environmental and human-rights hotspots where this crisis is concentrated. But it also tells the stories of some of the most common products we all consume—from computers to shrimp to jewelry—whose origins are found in these same places. Blood and Earth calls on us to recognize the grievous harm we have done to one another, put an end to it, and recommit to repairing the world. This is a clear-eyed and inspiring book that suggests how we can begin the work of healing humanity and the planet we share. Praise for Blood and Earth “A heart-wrenching narrative . . . Weaving together interviews, history, and statistics, the author shines a light on how the poverty, chaos, wars, and government corruption create the perfect storm where slavery flourishes and environmental destruction

follows. . . . A clear-eyed account of man's inhumanity to man and Earth. Read it to get informed, and then take action."—Kirkus Reviews (starred review) **"[An] exposé of the global economy's 'deadly dance' between slavery and environmental disaster . . . Based on extensive travels through eastern Congo's mineral mines, Bangladeshi fisheries, Ghanaian gold mines, and Brazilian forests, Bales reveals the appalling truth in graphic detail. . . . Readers will be deeply disturbed to learn how the links connecting slavery, environmental issues, and modern convenience are forged."**—Publishers Weekly **"This well-researched and vivid book studies the connection between slavery and environmental destruction, and what it will take to end both."**—Shelf Awareness (starred review) **"This is a remarkable book, demonstrating once more the deep links between the ongoing degradation of the planet and the ongoing degradation of its most vulnerable people. It's a bracing reminder that a mentality that allows throwaway people also allows a throwaway earth."**—Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet*
