An outpouring of memorial tributes and public expressions of grief followed the death of the Tejana recording artist Selena Quintanilla Pérez in 1995. The Latina superstar was remembered and mourned in documentaries, magazines, websites, monuments, biographies, murals, look-alike contests, musicals, drag shows, and more. Deborah Paredez explores the significance and broader meanings of this posthumous celebration of Selena, which she labels "Selenidad." She considers the performer's career and emergence as an icon within the political and cultural transformations in the United States during the 1990s, a decade that witnessed a "Latin explosion" in culture and commerce alongside a resurgence of anti-immigrant discourse and policy. Paredez argues that Selena's death galvanized Latina/o efforts to publicly mourn collective tragedies (such as the murders of young women along the U.S.-Mexico border) and to envision a brighter future. At the same time, reactions to the star's death catalyzed political jockeying for the Latino vote and corporate attempts to corner the Latino market. Foregrounding the role of performance in the politics of remembering, Paredez unravels the cultural, political, and economic dynamics at work in specific commemorations of Selena. She analyzes Selena's final concert, the controversy surrounding the memorial erected in the star's hometown of Corpus Christi, and the political climate that served as the backdrop to the touring musicals *Selena Forever* and *Selena: A Musical Celebration of Life*. Paredez considers what "becoming" Selena meant to the young Latinas who auditioned for the biopic *Selena*, released in 1997, and she surveys a range of Latina/o queer engagements with Selena, including Latina lesbian readings of the star's death scene and queer Selena drag. *Selenidad* is a provocative exploration of how commemorations of Selena reflected and changed Latinidad. The U. S. Constitution begins with the soaring words "We the People," but we, the people, have little to do with the document as most of us have come to know it. When most people think of the constitution they think of it as a legal instrument, the province of judges and lawyers, who alone possess the expertise and knowledge necessary to discern its elusive and complex meaning. This book outlines a very different view of the Constitution as a moral and philosophical statement about who we are as a nation. This "Civic Constitution" constitutes us as a civic body politic, transforming "the people" into a singular political entity. Juxtaposing this view with the legal model, the "Juridic Constitution," John E. Finn offers a comprehensive account of the Civic Constitution as a public affirmation of the shared principles of national self-identity, and as a particular vision of political community in which we the people play a significant and ongoing role in achieving a constitutional way of life. The Civic Constitution is the constitution of dialogical engagement, of contested meanings, of political principles, of education, of conversation. Peopling the Constitution seeks nothing less than a new interpretation of the American constitutional project in an effort to revive a robust understanding of citizenship. It considers the entire constitutional project, from its founding and maintenance to its failure, with insights into topics ranging from the practice of deliberative democracy and the meaning of citizenship, to constitutional fidelity, civic virtue, the separation of powers, federalism, and constitutional

interpretation. The Civic Constitution, in Finn's telling, is primarily a political project requiring an active, engaged, and most importantly, constitutionally educated citizenry committed to the civic virtues of civility and tending. When we as citizens are unwilling or unable to tend to and sustain the Constitution, and when constitutional questions reduce to legal questions and obscure civic interests, constitutional rot results. And in post-9/11 America, Finn argues, constitutional rot has begun to set in. With its multi-dimensional vision of constitutional governance, Finn's book stands as a corrective to accounts that locate the Constitution in and conceive it essentially as a legal instrument, making a powerful and impassioned argument for restoring the people to their rightful place in the politics and practice of the Constitution. Summary: During the Roman period the construction and maintenance of civic infrastructure and monuments, such as bath buildings, theatres, fountains, arches, statues and so on were regarded as the normal duty of well-off citizens, who constituted the local government. For the subsequent period, encompassing the 4th to the 7th century AD, it has long been assumed that changing social and political conditions within the Roman Empire resulted in a severe reduction of expenditure and concurrent loss of sentimental and aesthetic attitudes towards public space. This book challenges this assumption. It assesses the care still given to monuments and public space in the cities in the Eastern Mediterranean, reconstructs how the city represented itself, and focuses on the protagonists in this field. First, it evaluates the diverse initiators of interventions and their motivation. Second, the skills of the actual constructors are looked into in order to judge their identity and number. Third, the priorities of the viewers and use of public space. First full study devoted to the archery and crossbow guilds which grew up in Flanders in the middle ages. From the sweetness of a child's birth, or the excitement surrounding a much-belated honeymoon—to the crisis that almost tears her family apart. From the love that began, almost by chance, all those years ago... High school junior Jessica uses the arrival of a new boy to further her schemes of winning her ex-boyfriend back and becoming the next big Hollywood movie star. Reprint.
