Mammoths and Neanderthals in the Thames Valley Aug 19

2021 Today the Upper Thames Valley is a region of green pastures and well-managed farmland, interspersed with pretty villages and intersected by a meandering river. The discovery in 1989 of a mammoth tusk in river gravels at Stanton Harcourt, Oxfordshire, revealed the very different ancient past of this landscape. Here, some 200,000 years ago, mammoths, straight-tusked elephants, lions, and other animals roamed across grasslands with scattered trees, occasionally disturbed by small bands of Neanderthals. The pit where the tusk was discovered, destined to become a waste disposal site, provided a rare opportunity to conduct

intensive excavations that extended over a period of 10 years. This work resulted in the recording and recovery of more than 1500 vertebrate fossils and an abundance of other biological material, including insects, molluscs, and plant remains, together with 36 stone artefacts attributable to Neanderthals. The well-preserved plant remains include leaves, nuts, twigs and large oak logs. Vertebrate remains notably include the most comprehensive known assemblage of a distinctive small form of the steppe mammoth, *Mammuthus trogontherii*, that is characteristic of an interglacial period equated with marine

isotope stage 7 (MIS 7). Richly illustrated throughout, *Mammoths and Neanderthals in the Thames Valley* offers a detailed account of all these finds and will be of interest to Quaternary specialists and students alike.

The Heritage Crusade and the Spoils of History Nov 21 2021
Heritage has burgeoned over the past quarter of a century from a small élite preoccupation into a major popular crusade. Everything from Disneyland to the Holocaust Museum, from the Balkan wars to the Northern

Irish Troubles, from Elvis memorabilia to the Elgin Marbles bears the marks of the cult of heritage. In this acclaimed book David Lowenthal explains the rise of this new obsession with the past and examines its power for both good and evil. 'Timely and provocative...brilliant and stimulating pyrotechnic...everything from the Pilgrim Fathers to the Inuits, from Homer's Greece to the rainforests of Brazil.' Roy Strong, *The Sunday Times* '...entertaining and enthralling...' Ben Pimlott, *The Guardian*
[School Girls; or, The African Mean Girls Play](#) Sep 27 2019
Paulina, the reigning queen

bee at Ghana's most exclusive boarding school, has her sights set on the Miss Global Universe pageant. But the arrival of Ericka, a new student with undeniable talent and beauty, captures the attention of the pageant recruiter—and Paulina's hive-minded friends. This buoyant and biting comedy explores the universal similarities (and glaring differences) facing teenage girls across the globe.

Data Science for COVID-19 Nov 02 2022 Data Science for COVID-19, Volume 2: Societal and Medical Perspectives presents the most current and leading-edge research into the applications of a variety of data science techniques for the

detection, mitigation, treatment and elimination of the COVID-19 virus. At this point, Cognitive Data Science is the most powerful tool for researchers to fight COVID-19. Thanks to instant data-analysis and predictive techniques, including Artificial Intelligence, Machine Learning, Deep Learning, Data Mining, and computational modeling for processing large amounts of data, recognizing patterns, modeling new techniques, and improving both research and treatment outcomes is now possible. Provides a leading-edge survey of Data Science techniques and methods for research, mitigation and the treatment of the COVID-19

virus Integrates various Data Science techniques to provide a resource for COVID-19 researchers and clinicians around the world, including the wide variety of impacts the virus is having on societies and medical practice Presents insights into innovative, data-oriented modeling and predictive techniques from COVID-19 researchers around the world, including geoprocessing and tracking, lab data analysis, and theoretical views on a variety of technical applications Includes real-world feedback and user experiences from physicians and medical staff from around the world for medical treatment

perspectives, public safety policies and impacts, sociological and psychological perspectives, the effects of COVID-19 in agriculture, economies, and education, and insights on future pandemics

Data Mining Jan 04 2023 This book constitutes the refereed proceedings of the 16th Australasian Conference on Data Mining, AusDM 2018, held in Bathurst, NSW, Australia, in November 2018. The 27 revised full papers presented together with 3 short

papers were carefully reviewed and selected from 80 submissions. The papers are organized in topical sections on classification task; transport, environment, and energy; applied data mining; privacy and clustering; statistics in data science; health, software and smartphone; image data mining; industry showcase.

Openness and Development

Feb 22 2022 Openness and development are key words of central importance in describing the dynamism within the present world economy. Openness denotes the entire process of internationalization and liberalization now underway in the commodity markets, factor

markets and financial markets. Today there is hardly a national economy or company left which can afford to ignore international dependencies. In the broadest sense of the word, development encompasses all those dynamic endogenous economic processes which create prosperity and a high standard of living via innovation and structural change. Modern economic research has shown that both of these fields of economic causalities - which are themselves affected by a wide variety of interdependencies - determine the economic destiny of the national economies and of their actors in the industrial, newly industrializing, transitional and

developing countries. The present volume focuses on the significance of these two key words while conveying, at the same time, an impression of the broad spectrum of related issues. It contains papers written by economists working at universities and research institutes as well as papers submitted by "economic practitioners"; the latter, in particular, provide valuable insights on current issues by taking account of theoretical and practical considerations. Whereas the papers printed in Part I analyze their subjects from a general perspective, the emphasis in Part II is on specific regional aspects. Part I begins with a theoretical-

empirical study on the development of foreign trade. [Time Out Berlin](#) Apr 02 2020 No other European city is changing as quickly and completely as Berlin. The third edition of the "Time Out Berlin Guide" has been reshuffled, rewritten and revised by a team of resident experts, giving you an up-to-date overview of Germany's capital city. *The Tetris Effect* Jun 28 2022 The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product

which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first

viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.

The HP Way Aug 31 2022 In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions

of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to

change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago. *How to update your PC BIOS in 3 easy steps* Jul 18 2021 In this guide we will show you how to update your BIOS in a secure

and safe manner! Common reasons for applying a BIOS update are: Better stability of your PC Improved recognition of peripherals. (like hard disks, video cards, memory sticks) Support for newer CPUs which were not yet available at the time you bought your motherboard / PC Improve the performance of hard disk memory SSD CPU Better Overclocking support (eg. more stable, more features) Improved support for new operating systems (Windows 7, Windows 8, Linux, ...) Improved support for battery savings (eg. on laptops) *Data Mining* Feb 10 2021 This book constitutes the refereed proceedings of the 16th

Australasian Conference on Data Mining, AusDM 2018, held in Bathurst, NSW, Australia, in November 2018. The 27 revised full papers presented together with 3 short papers were carefully reviewed and selected from 80 submissions. This book examines the visual-sexual turn in social media discourses in the field of online activism with a particular focus on the extraordinary protest years of 2018-2020. Presenting a socially engaged theory of "tit-for-tat media" and including case-studies on activist movements such as the Euro-American alt-right, the pro-democracy movement in Hong Kong, and revolutionary artists in China, this study reveals how visual cultures, including gendered or sexualized imagery, are utilized to influence public perception. By presenting in-depth explorations of online ethnography, interviews with activists and studies of the

political histories and urban protests-environments, the volume uncovers how local artists, netizens and citizens are using media and digital imagery in contemporary activism. Covering a broad spectrum of social media content, from hyper-cute manga and cartoons to satirical pornography and sexualized hate-speech, it will be of huge interest to students and scholars of media and communication studies, political communication, sexuality and gender studies. Big Data Analytics and Knowledge Discovery Dec 03 2022 This book constitutes the refereed proceedings of the 17th International Conference on Data Warehousing and Knowledge Discovery, DaWaK 2015, held in Valencia, Spain, September 2015. The 31 revised full papers presented were carefully reviewed and selected from 90 submissions. The papers are organized in topical sections similarity measure and clustering; data

mining; social computing; heterogeneous networks and data; data warehouses; stream processing; applications of big data analysis; and big data. Knuckleheads in the News Jan 12 2021 YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts

after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.
