Until now, the resolution of international commercial and investment disputes has been dominated almost exclusively by international arbitration. But that is changing. Whilst they may be complementary mechanisms, international mediation and conciliation are now coming to the fore. Mediation rules that were in disuse gather momentum, and dispute settlement centres are introducing new mediation rules. The European Union is encouraging international mediation in both the commercial and investment spheres. The 2019 Singapore Mediation Convention of the United Nations Commission on International Trade Law (UNCITRAL) is aiming to ensure enforcement of international commercial settlement agreements resulting from mediation. The first investor-State disputes are mediated under the International Bar Association (IBA) rules. The International Centre for Settlement of Investment Disputes (ICSID)'s conciliation mechanism is resorted to more often than in the past. The International Chamber of Commerce (ICC) has recently administered its first mediation case based on a bilateral investment treaty, and a new training market on mediation is flourishing. Mediation in Commercial and Investment Disputes brings together a line-up of outstanding, highly-qualified experts from academia, mediation and arbitration institutions, and international legal practice, to address this highly topical, complex subject from a variety of angles. Mediation as a Mandatory Pre-condition to Arbitration debunks common arguments against the compatibility of mandatory investor-state mediation with the ISDS regime. Ana Ubilava pioneers an empirical analysis of over 600 investor-state arbitration cases and a doctrinal study of ISDS clauses in dozens of treaties. This book presents the first critical review of the less frequently addressed stakeholders in international investment law. Focusing on private actors, including but not limited to lawyers, experts, funders, civil society, the media and scholars, the book highlights the variety of actors that help shape international investment law and demonstrates how best to manage their interactions in order to achieve synergies and enhance the legitimacy of this pluralistic field.

Karl N. Llewellyn was one of the founders and major figures of legal realism, and his many keen insights have a central place in American law and legal understanding. Key to Llewellyn's thinking was his conception of rules, put forward in his numerous writings and most famously in his often mischaracterized declaration that they are "pretty playthings." Previously unpublished, *The Theory of Rules* is the most cogent presentation of his profound and insightful thinking about the life of rules. This book frames the development of Llewellyn's thinking and describes the difference between what rules literally prescribe and what is actually done, with the gap explained by a complex array of practices, conventions, professional skills, and idiosyncrasies, most of which are devoted to achieving a law's larger purpose rather than merely following the letter of a particular rule. Edited, annotated, and with an extensive analytic introduction by leading contemporary legal scholar Frederick Schauer, this rediscovered work contains material not found elsewhere in Llewellyn's writings and will prove a valuable contribution to the existing literature on legal realism.

Researched Content by experts. Volume 12 of the EYIEL focuses on “The Future of Dispute Settlement in International Economic Law”. While new forms of dispute settlement are emerging, others are in deep crisis. The volume starts off with reflections on Dispute Settlement and the World Trade Organisation, most prominently the crisis of the Appellate Body, but also addressing international intellectual property law and the African Continental Free Trade Area. This is followed by a section on Dispute Settlement and Investment Protection/International Investment Law, which includes articles on the summary dismissal of claims, the margin of appreciation doctrine, the use of conciliation to settle sovereign debt disputes, and contract-based arbitration in light of Achmea and Hagia Sophia at ICSID. Further contributions consider the emerging role of commercial courts, the dejudicialization of international economic law, dispute settlement in the UK-EU Withdrawal Agreement, reference mechanisms in dispute resolution clauses, and UNCLOS. Indian doctors, schooled in Western science, are ignorant of the medical ethics of their own culture. They make a conscious effort to distance themselves from Ayurvedic medicine, in which the ethical codes are enshrined. Teachers and students forget that values have universal applicability, regardless of the mode of practice - Western or traditional - and that the patient remains the same regardless of the system.
