Seaport gateways and the corridors which connect them to widely dispersed hinterlands are of vital and essential importance to international trade and the world economy. Distributing goods to ultimate land destinations or bringing the goods to seaports from inland origins is organizationally complex involving multiple actors. This book furthers understanding about how this movement is organized, the role of ports acting as gateways and the actions of corridor players. A key question that confronts the shipping and port industries, as well as public authorities, is how to increase the benefits of maritime trade to the companies and institutions directly involved as well as the port city-regions where the transfers take place? This question is being posed in the midst of a global economic recession and trade downturn, and in the context of contemporary policy frameworks whose goals are to generate economic benefits and efficiencies rather than to maximize traffic volumes. This book puts into perspective the reality, opportunities and challenges facing seaport gateways and corridors now and in the future. Includes Part 1, Number 1 & 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (January - December) This step-by-step, highly visual text provides a comprehensive introduction to managing and maintaining computer hardware and software. With every great move of God upon the earth, the Lord has always first prepared His people. Before removing Israel from Egypt, His people had a time of preparation. They turned their hearts toward their God and applied blood to the door of their homes. When it was finally time for Israel to move from wilderness to Promise Land, the people were given three days "to prepare - to possess!" Just before God brought His Messiah upon the scene of history, He first sent a messenger saying, "Prepare yourself for the Lord's coming and level a straight path inside your hearts for Him." And now God is saying AGAIN, on this the third day of history, - PREPARE YOURSELF! Prepare for the greatest move of God the earth has ever seen! This manual is the "how" to prepare our hearts for the Lord. It is a precise and detailed view of our lives that uncovers hidden lies and pockets of sin that have defeated us in the past. It exposes the major areas of our hearts and asks the questions that lead us into light and freedom. This manual prepares us to be a landing place for Holy Spirit to come and establish the kingdom, release freedom, and produce victory. Take this step-by-step journey for your own personal life and also use it to bring spiritual freedom to your family and church. God is inviting and preparing us for the greatest show of His glory on earth! InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects. Hundreds of billions of dollars are lost globally each year due to project and program failures in virtually all fields. Continued project failures, setbacks and losses have prompted me to question the adequacy of the current concepts, models and practices of project and program management, and to explore opportunities for change. In my view the contemporary approaches do not adequately address the real challenges of planning and delivery of projects and programs of significant size. Evidence from numerous field studies shows that projects and programs continue to underperform, or fail with massive losses and disillusioned clients and sponsors. Clearly, a fresh perspective and approach is needed to ensure that projects will deliver the outcomes that the stakeholders aspire to. For this to realise, it is imperative that client and sponsor organisations adopt a new mindset, and a vastly different approach to management of projects and programs. It is incumbent upon all client bodies to exercise a hands-on proactive approach, ensure that they understand complexities, and invest in creating the requisite capabilities for planning and management of their projects and programs. I have written this book, together with Volume 2, in a style that can assist both scholars and practitioners to adopt and tailor the contents to suit their needs. My main motivation is to promote a more strategic and integrative approach to planning and delivery of projects and programs of significant size. I have attempted to bring together the key elements of knowledge related to project business and project management, and present these in a consistent and coherent framework, coupled with the relevant processes needed for their practical application. The integrated business and project management (IBPM) approach embodies a fresh perspective, frameworks, processes and tools for strategic planning, development and management of projects and programs of significant size.
