In *The Wild Irish Girl*, the powerful Irish heroine's marriage to a heroic Englishman symbolizes the Anglo-Irish novelist Lady Morgan's re-imagining of the relationship between Ireland and Britain and between men and women. Using this most influential of pro-union novels as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps out the genealogy of this development, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s. Tracy's model enables him to elaborate the ways in which gender ideals are specifically contested in fiction, the discourses of political debate and social reform, and the popular press, for the purpose of defining not only the place of the Irish in the union with Great Britain, but the nature of Britishness itself. Horticulturist Ogren explores the safe sex issue (plant sex, that is), as well as many other allergy-related topics: organic gardening, protecting pets against allergies, handling allergy-related stress, and global warming's effect on allergies. Inter-disciplinary in approach, this collection of essays explores China's reform era development within the concept of translocality. A key element of spatial change in today's China has been the unprecedented geographic mobility of millions of labour migrants, tourists, brides, entrepreneurs, and many others. But translocality doesn't just mean people. It is crucially constituted by the circulation of capital, ideas, images, goods, styles, services, and disease to name but a few. With contributions from well-respected China specialists, the essays focus simultaneously on mobilities and localities, drawing our attention to the multiplying forms of mobility in China whilst retaining the importance of localities in people's lives. The book provides a clear path to understanding the importance of translocality as a concept along with concrete examples of its operation in China. Unique in approach, it is at once a study of the connections between location and culture, politics, economics, bodies, gender and technology.
