Sarah's

WordPress tutorial walks you through creating a website yourself using step-by-step lessons that are easy to follow. Making a website as a beginner has never been easier! Why should you build your own website on your own domain instead of using a free service? The answer is that, with your own privately registered domain and hosting account, YOU own and control the website, not anybody else. You can put whatever you like on your site and no-one can tell you otherwise. You can make your site look and behave how you like. You're the boss. And, with your own website, you can build your own distinctive 'brand', whether you are a business or a community group, an individual, or whatever... Your domain becomes your own exclusive web address, your own piece of online virtual 'real estate' that plays its part in publicizing your mission or message. Creating a website on your own domain gives you identity, visibility and, indeed, status. But don't you need a professional web designer to make a good job building a website? No, definitely not! This was the case in the early days of the Internet because only a few tech-savvy geeks knew and understood the computer language (HTML) required. But as the technology has advanced, so have the tools to build websites become more accessible. WordPress is one of these tools and WordPress is the subject of this e-book. But how much does it cost to make a website? The answer is just a few bucks per month for hosting. If you create your own website using WordPress, you don't have to spend another cent. And what if you're looking to start a blog? Well, the same instructions apply. WordPress was originally designed as a blogging platform and this ebook shows you just how to build a blog using the same techniques as designing a website. Whether you want to create a simple WordPress blog or design a full-blown ecommerce site, Sarah's 'WordPress To Go' will start you off on the right foot. Dive more with WordPress – in less time! Wordpress For Beginners WEBSITE DESIGN WITH WORDPRESS This Book Will Save You a LOT of TIME - And TIME Is MONEY!

Here's my quick story and why I wrote this book: As an entrepreneur in real estate originally, I had set up on my own HTML website way back in 2006 that kept growing with property profiles and images. I had so much media and pages that I was losing track of URL's and menus, seeing as it was a static HTML site, all changes had to be done manually then "FTP'd" up to the hosting account, and the site had no CMS (Content management system). This was very time consuming and stressful! Thankfully we have CMS's now. Once I discovered Wordpress in 2012, it changed my online presence forever, in fact, I went wild with it and created up to 30 awesome dynamic websites using various themes and cloned pages for various online businesses I have that made life SO MUCH SIMPLER, and the sites looked way better than the old HTML sites. You can even get Wordpress applications that manage all of your Wordpress sites in one dashboard! If you're a newbie entrepreneur, you have to have a dynamic website today with the ability to make funnel pages and quick text or post changes.
