**Thinking for a Living** Aug 31 2022 Knowledge workers create the innovations and strategies that keep their firms competitive and the economy healthy. Yet, companies continue to manage this new breed of employee with techniques designed for the Industrial Age. As this critical sector of the workforce continues to increase in size and importance, that's a mistake that could cost companies their future. Thomas Davenport argues that knowledge workers are vastly different from other types of workers in their motivations, attitudes, and need for autonomy--and, so, they require different management techniques to improve their performance and productivity. Based on extensive research involving over 100 companies and more than 600 knowledge workers, *Thinking for a Living* provides rich insights into how knowledge workers think, how they accomplish tasks, and what motivates them to excel. Davenport identifies four major categories of knowledge workers and presents a unique framework for matching specific types of workers with the management strategies that yield the greatest performance. Written by the field's premier thought leader, *Thinking for a Living* reveals how to maximize the brain power that fuels organizational success. Thomas Davenport holds the President's Chair in Information Technology and Management at Babson College. He is director of research for Babson Executive Education; an Accenture Fellow; and author, co-author, or editor of nine books, including *Working Knowledge*:

How Organizations Manage What They Know (HBS Press, 1997).

Handbook on Business Process Management 2 Dec 03 2022

Business Process Management (BPM) has become one of the most widely used approaches for the design of modern organizational and information systems. The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities. This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders. This second volume focuses on the managerial and organizational challenges of BPM such as strategic and cultural alignment, governance and the education of BPM stakeholders. As such, this book provides concepts and methodologies for the integration of BPM. Each chapter has been contributed by leading international experts. Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM. The second edition of this handbook has been significantly revised and extended. Each chapter has been updated to reflect the most current developments. This includes in particular new technologies such as in-memory data and process management, social media and networks. A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts. This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM.

*Working Knowledge* Nov 02 2022 This influential book establishes the enduring vocabulary and concepts in the burgeoning field of knowledge management. It serves as the hands-on resource of choice for companies that recognize knowledge as the only sustainable source of competitive advantage going forward. Drawing from their work with more than thirty knowledge-rich firms, Davenport and Prusak--experienced consultants with a track record of success--examine how all types of companies can effectively understand, analyze, measure, and manage their intellectual assets, turning corporate wisdom into market value. They categorize knowledge work into four sequential activities--accessing, generating, embedding, and transferring--and look at the key skills, techniques, and processes of each. While they present a practical approach to cataloging and storing knowledge so that employees can easily leverage it throughout the firm, the authors caution readers on the limits of communications and information technology in managing intellectual capital.

**Analytics and Big Data: The Davenport Collection (6 Items)** Oct 09 2020 The Analytics and Big Data collection offers a "greatest hits" digital compilation of ideas from world-renowned thought leader Thomas Davenport, who helped popularize the terms analytics and big data in the workplace. An agile and prolific thinker, Davenport has written or coauthored more than a dozen bestselling books. Several of these titles are offered together for the first time in this curated digital bundle, including: Big Data at Work, Competing on Analytics, Analytics at Work, and Keeping Up with the Quants. The collection also includes Davenport's popular Harvard Business Review articles, "Data Scientist: The Sexiest Job of the 21st Century" (2012) and "Analytics 3.0" (2013). Combined,

these works cover all the bases on analytics and big data: what each term means; the ramifications of each from a technical, consumer, and management perspective; and where each can have the biggest impact on your business. Whether you're an executive, a manager, or a student wanting to learn more, *Analytics and Big Data* is the most comprehensive collection you'll find on the ever-growing phenomenon of digital data and analysis—and how you can make this rising business trend work for you. Named one of the ten “Masters of the New Economy” by CIO magazine, Thomas Davenport has helped hundreds of companies revitalize their management practices. He combines his interests in research, teaching, and business management as the President’s Distinguished Professor of Information Technology & Management at Babson College. Davenport has also taught at Harvard Business School, the University of Chicago, Dartmouth’s Tuck School of Business, and the University of Texas at Austin and has directed research centers at Accenture, McKinsey & Company, Ernst & Young, and CSC. He is also an independent Senior Advisor to Deloitte Analytics.

*The Intelligent Company* Feb 22 2022 Today's most successful companies are Intelligent Companies that use the best available data to inform their decision making. This is called Evidence-Based Management and is one of the fastest growing business trends of our times. Intelligent Companies bring together tools such as Business Intelligence, Analytics, Key Performance Indicators, Balanced Scorecards, Management Reporting and Strategic Decision Making to generate real competitive advantages. As information and data volumes grow at explosive rates, the challenges of managing this information is turning into a losing battle for most companies and they end up drowning in data while thirsting for insights. This is made worse by the severe skills shortage in analytics, data presentation and communication. This latest book by best-selling management expert Bernard Marr will equip you with a set of powerful skills that are vital for successful managers now and in the

future. Increase your market value by gaining essential skills that are in high demand but in short supply. Loaded with practical step-by-step guidance, simple tools and real life examples of how leading organizations such as Google, CocaCola, Capital One, Saatchi & Saatchi, Tesco, Yahoo, as well as Government Departments and Agencies have put the principles into practice. The five steps to more intelligent decision making are: Step 1: More intelligent strategies – by identifying strategic priorities and agreeing your real information needs Step 2: More intelligent data – by creating relevant and meaningful performance indicators and qualitative management information linked back to your strategic information needs Step 3: More intelligent insights – by using good evidence to test and prove ideas and by analysing the data to gain robust and reliable insights Step 4: More intelligent communication – by creating informative and engaging management information packs and dashboards that provide the essential information, packaged in an easy-to-read way Step 5: More intelligent decision making – by fostering an evidence-based culture of turning information into actionable knowledge and real decisions "Bernard Marr did it again! **Silken Prey** Jan 12 2021 A Lucas Davenport thriller by internationally bestselling novelist John Sandford Murder, scandal, political espionage and an extremely dangerous woman. Lucas Davenport's going to be lucky to get out of this one alive. A Minnesota political fixer has hit the jackpot - or so he thinks. Hired to take down the incumbent US senator with a vicious smear, to open the way for an ambitious, take-no-prisoners heiress who sees the Senate as merely a stepping-stone, he decides his payoff should be larger. The blackmail demand should yield some pretty large numbers, he thinks. Instead, he gets only a small one - 9 millimeters, to be exact. In the heart. Davenport is investigating the smear when the trail leads to the man's disappearance, then - very troublingly - to the Minneapolis police department, then - most troublingly of all - to a woman who could give Machiavelli lessons. She has very definite ideas about the way the world should work, and the money, ruthlessness and sheer will to make it happen. No matter who gets in the way. \*\*\*READERS LOVE THE PREY SERIES\*\*\* 'John Sandford knows all there is to know about detonating the gut-level shocks of a good thriller' The New York Times Book Review ? The AI Advantage Jul 18 2021 Cutting through the hype, a practical guide to using artificial intelligence for business benefits and competitive advantage. In *The AI Advantage*, Thomas Davenport offers a guide to using artificial intelligence in business. He describes what technologies are available and how companies can use them for business benefits and competitive advantage. He cuts through the hype of the AI craze—remember when it seemed plausible that IBM's Watson could cure cancer?—to explain how businesses can put artificial intelligence to work now, in the real world. His key recommendation: don't go for the “moonshot” (curing cancer, or synthesizing all investment knowledge); look for the “low-hanging fruit” to make your company more efficient. Davenport explains that the business value AI offers is solid rather than sexy or splashy. AI will improve products and processes and make decisions better informed—important but largely invisible tasks. AI technologies won't replace human workers but augment their capabilities, with smart machines to work alongside smart people. AI can automate structured and repetitive work; provide extensive analysis of data through machine learning (“analytics on steroids”), and engage with customers and employees via chatbots and intelligent agents. Companies should experiment with these

technologies and develop their own expertise. Davenport describes the major AI technologies and explains how they are being used, reports on the AI work done by large commercial enterprises like Amazon and Google, and outlines strategies and steps to becoming a cognitive corporation. This book provides an invaluable guide to the real-world future of business AI. A book in the Management on the Cutting Edge series, published in cooperation with MIT Sloan Management Review.

**Profiles in Performance** Aug 19 2021 Too many organizations invest in performance management and business intelligence projects, without first establishing the needed conditions to ensure success. But the organizations that lay the groundwork for effective change first reap the benefits. In *Profiles in Performance: Business Intelligence Journeys and the Road Map for Change*, Howard Dresner (author of *The Performance Management Revolution*) worked with several extraordinary organizations to understand their thriving "performance-directed culture." In doing so, he developed a unique maturity model-which served as both a filter to select candidates and as a lens to examine accomplishments. Interviews with people from all sides of the organization: business users, finance, senior management and the IT department Provides a complete picture of their progress from inception to current state The models, analyses and real world accounts from these cases will be an invaluable resource to any organization hoping to improve or initiate their own performance-directed culture.

*Knowledge Management Case Book* Jan 04 2023 This book provides a perspective on knowledge management at Siemens - an internationally recognised benchmark - by presenting the reader with the best of the corporation's practical applications and experiences. Tom Davenport and Gilbert Probst bring together instructive case studies from different areas that reflect the rich

insights gained from years of experience in practising knowledge management. Most of the cases have been updated for the second edition. New cases have been added. The Knowledge Management Case Book provides a comprehensive account of how organisational knowledge assets can be managed effectively. Specific emphasis is given to the development of generic lessons that can be learned from Siemens' experience. The book also offers a roadmap to building a "mature knowledge enterprise", thereby enhancing our understanding of the steps that need to be taken in order to sustain competitive dominance in the knowledge economy. Presenting applications from very different areas, this practice-orientated book is really outstanding in the broad field of KM literature. "Perhaps the most revealing - and interesting - part of the cases in this book is not the analysis of the various knowledge management tools and processes, but the description of their development, of how they come about, of how commitment was gained, of how implementation was led." Yves Doz, The Timken Chaired Professor of Global Technology and Innovation at INSEAD, Fontainebleau "This case book brings insights how our most valuable resource makes those tools happen. I found this book exciting reading, because it is, to my knowledge, the only book where a single company with a wide variety of knowledge management approaches accumulates years of experiences and lessons learned. Edited by two of the leading thinkers in the field of knowledge management, this book will show the way you practise knowledge management in your company." Heinz Fischer, Global Head of HR, Deutsche Bank AG "This book is a rare and valuable description of a single company's knowledge management journey. Siemens has made impressive advances in becoming a knowledge-driven firm, and this volume details many of its directions and waystations." Laurence Prusak, Executive Director, IBM Institute for Knowledge Management "Though there are many books on Knowledge Management, this is a unique one on a sense that it provides

practical application of KM rather than the jargon." Sushil, Modi Foundation Chair Professor and Group Chair, Department of Management Studies, Indian Institute of Technology, New Delhi
