Joan Miró May 31 2020 In the late 1920s Joan Miro's attacks on the grand tradition of painting became more pronounced, and none was more notorious than the claim that he wanted to assassinate it. Just what he might have meant by this curiously aggressive salvo - and the radical changes his work underwent at that time - is investigated in *Joan Miro: Painting and Anti-Painting, 1927-1937*, which explores twelve series of his works from that decade, along with the single painting that acts as its affecting coda. With close attention paid to the materials he used and to the political, biographical, and intellectual context in which he worked, Miro's paradoxical nature emerges: an artist of violence and resistance who - despite his assassination tactics - never cease to be a painter.

Nitrogen-Rich Energetic Materials Apr 30 2020 Nitrogen-Rich Energetic Materials Provides in-depth and comprehensive knowledge on both the chemistry and practical applications of nitrogen-rich energetic materials Energetic materials, a class of material with high amounts of stored chemical energy, include explosives, pyrotechnics, and propellants. Initially used for military applications, nitrogen-rich energetic materials have become important in the civil engineering and aerospace sectors, they are increasingly used in commercial mining and construction as well as in rocket propulsion. Making these nitrogen-rich energetic materials safer, more powerful, and more cost-

effective requires a thorough understanding of their chemistry, physics, synthesis, properties, and applications. Nitrogen-Rich Energetic Materials presents a detailed summary of the development of nitrogen-rich energetic materials over the past decade and provides up-to-date knowledge on their applications in various areas of advanced engineering. Edited by a panel of international experts in the field, this book examines the chemistry of pentazoles, fused ring and laser ignitable nitrogen-rich compounds, polynitrogen and tetrazole-based energetic compounds, and more. The text also introduces applications of nitrogen-rich energetic materials in energetic polymers and metal-organic frameworks, as pyrotechnics materials for light and smoke, and in oxadiazoles from precursor molecules. This authoritative volume: Presents in-depth chapters written by leading experts in each sub-field covered Offers a systematic introduction to new and emerging applications of nitrogen-rich energetic materials such as in computational chemistry Discusses recent advances in nitrate ester chemistry with focus on propellant applications Discusses green and eco-friendly approaches to nitrogen-rich compounds Nitrogen-Rich Energetic Materials is an important resource for researchers, academics, and industry professionals across fields, including explosives specialists, pyrotechnicians, materials scientists, polymer chemists, laser specialists, physical chemists, environmental chemists, chemical engineers, and safety officers.

User Story Mapping Dec 07 2020 User story mapping is a valuable tool for software development, once you understand why and how to use it. This insightful book examines how this often misunderstood technique can help your team stay focused on users and their needs without getting lost in the enthusiasm for individual product features. Author Jeff Patton shows you how changeable story maps enable your team to hold better conversations about the project throughout the development process. Your team will learn to come away with a shared understanding of what you're attempting to build and why. Get a high-level view of story mapping, with an exercise to learn key concepts quickly Understand how stories really work, and how they come to life in Agile and Lean projects Dive into a story's lifecycle, starting with opportunities and moving deeper into discovery Prepare your stories, pay attention while they're built, and learn from those you convert to working software

Lessons in Courage Aug 15 2021 Presents step-by-step instructions on Peruvian shamanic spiritual practices.

Annual Report of the Commissioner of Education Sep 03 2020

Value Proposition Design Feb 27 2020 The authors of the international bestseller *Business Model Generation* explain how to create value propositions customers can't resist Value Proposition Design helps you tackle the core challenge of every business — creating compelling products and services customers want to buy. This

highly practical book, paired with its online companion, will teach you the processes and tools you need to create products that sell. Using the same stunning visual format as the authors' global bestseller, *Business Model Generation*, this sequel explains how to use the "Value Proposition Canvas" to design, test, create, and manage products and services customers actually want. Value Proposition Design is for anyone who has been frustrated by new product meetings based on hunches and intuitions; it's for anyone who has watched an expensive new product launch fail in the market. The book will help you understand the patterns of great value propositions, get closer to customers, and avoid wasting time with ideas that won't work. You'll learn the simple process of designing and testing value propositions, that perfectly match customers' needs and desires. In addition the book gives you exclusive access to an online companion on Strategyzer.com. You will be able to assess your work, learn from peers, and download pdfs, checklists, and more. Value Proposition Design is an essential companion to the "Business Model Canvas" from *Business Model Generation*, a tool embraced globally by startups and large corporations such as MasterCard, 3M, Coca Cola, GE, Fujitsu, LEGO, Colgate-Palmolive, and many more. Value Proposition Design gives you a proven methodology for success, with value propositions that sell, embedded in profitable business models."

SAP MM INVOICE VERIFICATION Mar 29 2020 Invoice verification is an important business process in almost every company. In SAP you can verify invoices against purchase orders and goods receipts. SAP provides important functionalities like automatic account determination, financial posting, etc. SAP is powerful software that can meet the needs of any business scenario for any type of business in any part of the world. Its all encompassing nature makes SAP complex. In order to derive maximum benefit for business, SAP must be understood well. Mr. Agrawal attempts to explain SAP completely; a seemingly impossible task. This is his third book on the Materials Management module; his first two books in the Materials Management module are 'Purchasing' and 'Inventory Management'. In this book, like in his earlier books, he explains every screen of SAP MM Invoice Verification. Both the SAP Menu and Customizing Implementation Guide are expanded and the chapter number where they are covered is indicated. This not only creates a direct link between the book and the SAP software, but also ensures that the book is comprehensive. The author has taken care to balance details with overviews that explain linkages between concepts. The book is organized in chapters that are important business activities. Each chapter covers business processes carried out in SAP by the user as well as its related configuration. This book can be used to learn SAP from scratch; it is a learning guide. It is, therefore, useful to persons who are training to be SAP Consultants. Having learnt SAP with the help of this book, the

Consultant keeps returning to refer to it. In implementation of SAP, Consultants prepare User Manual. With the availability of this book, their task becomes simpler. In the User Manual, they need to cover only implementation specific points. The user refers to this book as a generic User Manual. As the user gains knowledge he also begins to understand the customizing settings for his implementation. This book can also be used by Business Process Owners and Senior Managers to get an overview of SAP and the important choices it offers.

The New York School Poets and the Neo-Avant-Garde Aug 22

2019 New York City was the site of a remarkable cultural and artistic renaissance during the 1950s and '60s. In the first monograph to treat all five major poets of the New York School—John Ashbery, Barbara Guest, Kenneth Koch, Frank O'Hara, and James Schuyler—Mark Silverberg examines this rich period of cross-fertilization between the arts. Silverberg uses the term 'neo-avant-garde' to describe New York School Poetry, Pop Art, Conceptual Art, Happenings, and other movements intended to revive and revise the achievements of the historical avant-garde, while remaining keenly aware of the new problems facing avant-gardists in the age of late capitalism. Silverberg highlights the family resemblances among the New York School poets, identifying the aesthetic concerns and ideological assumptions they shared with one another and with artists from the visual and performing arts. A unique feature of the book is Silverberg's annotated catalogue of collaborative works by the five poets and other artists. To comprehend the coherence of the New York School, Silverberg demonstrates, one must understand their shared commitment to a reconceptualized idea of the avant-garde specific to the United States in the 1950s and '60s, when the adversary culture of the Beats was being appropriated and repackaged as popular culture. Silverberg's detailed analysis of the strategies the New York School poets used to confront the problem of appropriation tells us much about the politics of taste and gender during the period, and suggests new ways of understanding succeeding generations of artists and poets.

Reflective Cracking in Pavements Apr 22 2022 Proceedings of RILEM TC-PRC third conference on this subject. Papers from road authorities, engineers, researchers, contractors and manufacturers discussing the implementation and the long term behaviour of overlay systems. The following topics are covered: prevention and cracking assessment, choice and design of overlay systems, practical implemen

Many Subtle Channels Sep 23 2019 Main description: What sort of society could bind together Jacques Roubaud, Italo Calvino, Marcel

Duchamp, and Raymond Queneau—and Daniel Levin Becker, a young American obsessed with language play? Only the Oulipo, the Paris-based experimental collective founded in 1960 and fated to become one of literature's quirkiest movements. An international organization of writers, artists, and scientists who embrace formal and procedural constraints to achieve literature's possibilities, the Oulipo (the French acronym stands for Oworkshop for potential literature0) is perhaps best known as the cradle of Georges Perec's novel *A Void*, which does not contain the letter e. Drawn to the Oulipo's mystique, Levin Becker secured a Fulbright grant to study the organization and traveled to Paris. He was eventually offered membership, becoming only the second American to be admitted to the group. From the perspective of a young initiate, the Oulipians and their projects are at once bizarre and utterly compelling. Levin Becker's love for games, puzzles, and language play is infectious, calling to mind Elif Batuman's delight in Russian literature in *The Possessed*. In recent years, the Oulipo has inspired the creation of numerous other collectives: the OuMuPo (a collective of DJs), the OuMaPo (marionette players), the OuBaPo (comic strip artists), the OuFlarfPo (poets who generate poetry with the aid of search engines), and a menagerie of other Ou-X-Pos (workshops for potential something). Levin Becker discusses these and other intriguing developments in this history and personal appreciation of an iconic-and iconoclastic-group.

Traveling Between the Worlds Jan 08 2021 For anyone who's ever had the desire to look at the world through the eyes of our indigenous ancestors, here is a unique opportunity. *Traveling Between the Worlds* is a treasure trove of insight and exploration into the ancient spiritual wisdom of such diverse cultures as Ireland, Africa, and the Americas. The keeper of this wisdom is the shaman—a man or woman who can, at will, enter into altered states of consciousness in order to acquire extrasensory knowledge and healing power. In this important book, Hillary S. Webb invites us to eavesdrop on her conversations with some of today's most influential teachers and writers of shamanism. While the conversations cover a variety of topics pertaining to the shaman's path and practice, this book explores how we in the modern world can use these ancient teachings to help ourselves, each other, and the world around us. Included in this book are conversations with: Renowned author and environmentalist John Perkins, who brings corporate executives to the Amazon to teach them the value of merging business and eco-philosophy. Rabbi Gershon Winkler, who uses the beliefs and techniques of the Jewish shamanic tradition to bring Israelis and Palestinians together on common, and more peaceful, ground—their indigenous roots. "Renegade" shaman Ken Eagle Feather of the Toltec tradition, who explains how modern technology can help us evolve into the next level of perception. Peruvian shaman Oscar Miro-Quesada, whose ideas on life and death may alter your view of reality itself. And that is just the beginning.

Miró in America Jul 26 2022

Miró on Mallorca Feb 06 2021 From his childhood on, Mallorca was to be a second home for Joan Miro. His mother hailed from the island, as did his wife Pilar Juncosa. A refuge for many Republicans, Mallorca became Miro's permanent place of abode from the mid-1950s onward. He acquired a plot of land overlooking the Bahia de Palma, upon which he commissioned his friend Josep Lluís Sert to build a spacious studio. He died there in 1983 at the age of ninety. *Miró on Mallorca* concerns itself primarily with the varied themes and techniques of the artist's later works - painting, sculpture, prints, and ceramics - which, with the exception of the latter, were all created in his studios on the island. It was the clear light of Mallorca that especially fascinated Miro - the poetic blues of the sky and the sea. In his sculpture, he was especially inspired by the artistic creativity of the island inhabitants, not to mention the agriculture and the precipitous cliffs which give the landscape of Mallorca its unique quality.

Rosetta: The Remarkable Story of Europe's Comet Explorer Nov 29 2022 In 2014, Rosetta became the first mission to orbit a comet and to deploy a lander onto its surface. This is the story of ESA's pioneering comet explorer, following the mission from its initial inception to its historic touchdown. Read along as the Rosetta orbiter and its lander, Philae, evolve over the years, overcoming early mission hurdles before embarking on their one-way, decade-long voyage to a comet. See how the saga then culminates with Rosetta and Philae at last unveiling their icy target and achieving an unprecedented touchdown on its surface. Award-winning space writer Peter Bond takes us behind the scenes of this historic endeavor, sharing insights from the international team of scientists and engineers who made the mission possible, describing the remarkable technology that they created, and delving into the treasure trove of scientific discoveries that followed. Recounting in vivid detail the inner workings of Rosetta, this book is a celebration of the mission that has left a lasting impact on planetary science and space exploration.

The Chronology of American Literature Jan 26 2020 Ranging from the colonial era to the present day, this authoritative reference encompasses the full range of American literary developments as it spotlights major and popular works of fiction, nonfiction, plays, and poetry; biographical profiles of authors; literary journals; and other trends, themes, award winners, and more.

The Creative Pendulum Nov 05 2020 Awaken your own innate creative potential by using pendulum work to clear energetic blocks. The Creative Pendulum demonstrates how to use the pendulum to unlock

your inner artist, allowing you to discover or expand your creative potential. Dowsing with a pendulum is a quick, direct path to the sub- and super-conscious levels, to higher forces, and to the Muse herself. Thirty pendulum creativity charts are offered that help clear, center, unblock, and guide a person forward, so that anyone may more easily enter the creative space to play and work. Staffen offers practical information and tips so that anyone can learn to dowse, but even experienced practitioners will find exciting new ways of using a pendulum. The book includes Joan's own story of how the pendulum helped her transition from businesswoman to author and visual artist, bringing the power of the pendulum to real life.

Research and Education in Robotics -- EUROBOT 2008 Nov 17 2021 This volume constitutes the refereed proceedings of the International Conference on Research and Education in Robotics, EUROBOT 2008, held in Heidelberg, Germany, in May 2008. The EUROBOT Conference 2008 was accompanied by the international amateur robotics contest EUROBOTopen final, edition 2008. The 18 revised full papers presented were carefully reviewed and selected from the 33 papers which had built the main program of the conference. A fundamental aspect of EUROBOT is the promotion of sciences and technology among young students and researchers. The theme for 2008 was ""Mission to Mars""

Sprint Mar 22 2022 NEW YORK TIMES BESTSELLER WALL STREET JOURNAL BESTSELLER "Sprint offers a transformative formula for testing ideas that works whether you're at a startup or a large

organization. Within five days, you'll move from idea to prototype to decision, saving you and your team countless hours and countless dollars. A must read for entrepreneurs of all stripes." --Eric Ries, author of *The Lean Startup* From three partners at Google Ventures, a unique five-day process for solving tough problems, proven at more than a hundred companies. Entrepreneurs and leaders face big questions every day: What's the most important place to focus your effort, and how do you start? What will your idea look like in real life? How many meetings and discussions does it take before you can be sure you have the right solution? Now there's a surefire way to answer these important questions: the sprint. Designer Jake Knapp created the five-day process at Google, where sprints were used on everything from Google Search to Google X. He joined Braden Kowitz and John Zeratsky at Google Ventures, and together they have completed more than a hundred sprints with companies in mobile, e-commerce, healthcare, finance, and more. A practical guide to answering critical business questions, *Sprint* is a book for teams of any size, from small startups to Fortune 100s, from teachers to nonprofits. It's for anyone with a big opportunity, problem, or idea who needs to get answers today.

PlanePlotter User Guide Aug 27 2022 This is a comprehensive user guide for the PlanePlotter virtual radar software program that receives and decodes live digital position reports from aircraft and plots their positions and movements on air traffic control type charts. PlanePlotter provides a radar-like display of not only local aircraft but

aircraft around the world that are transmitting the digital messages in the ACARS, ADS-B and HFDL formats. PlanePlotter plots aircraft positions, altitudes and times decoded from the message traffic that it receives including embedded position reports, AMDAR reports and ADS reports contained in ACARS messages and ADS-B position reports received by a variety of virtual radar boxes including the Kinetic-Avionic's SBS1(tm), AirNav System's RadarBox(tm), the PlaneGadget Radar and the Mode-S Beast virtual radar receivers. The book has some 300 pages and includes 200 illustrations and diagrams. The latest edition covers the functions of Multilateration, Beamfinder and Conditional Expressions.
