IDEO, the widely admired, award-winning design and

*development firm that brought the world the Apple mouse, Polaroid's I-Zone instant camera, the Palm V, and hundreds of other cutting-edge products and services, reveals its secrets for fostering a culture and process of continuous innovation. There isn't a business in America that doesn't want to be more creative in its thinking, products, and processes. At many companies, being first with a concept and first to market are critical just to survive. In *The Art of Innovation*, Tom Kelley, general manager of the Silicon Valley based design firm IDEO, takes readers behind the scenes of this wildly imaginative and energized company to reveal the strategies and secrets it uses to turn out hit after hit. IDEO doesn't buy into the myth of the lone genius working away in isolation, waiting for great ideas to strike. Kelley believes everyone can be creative, and the goal at his firm is to tap into that wellspring of creativity in order to make innovation a way of life. How does it do that? IDEO fosters an atmosphere conducive to freely expressing ideas, breaking the rules, and freeing people to design their own work environments. IDEO's focus on teamwork generates countless breakthroughs, fueled by the constant give-and-take among people ready to share ideas and reap the benefits of the group process. IDEO has created an intense, quick-turnaround, brainstorm-and-build process dubbed "the Deep Dive." In entertaining anecdotes, Kelley illustrates some of his firm's own successes (and joyful failures), as well as pioneering efforts at other leading companies. The book reveals how teams research and immerse themselves in every possible aspect of a new product or service, examining it from the perspective of clients, consumers, and other critical audiences. Kelley takes the reader through the IDEO problem-solving method:*

- br" Carefully observing the behavior or "anthropology" of the people who will be using a product or service*
- br" Brainstorming with high-energy sessions focused on tangible results*
- br" Quickly prototyping ideas and designs at every step of the way*
- br" Cross-pollinating to find solutions from other fields*
- br" Taking risks, and failing your way to success*

The moufflon, a wild sheep prized for its meat, continues to survive in the remote mountain desert of southern Libya. Only Asouf, a lone bedouin who cherishes the desert and identifies with its creatures, knows exactly where it is to be found. Now he and the moufflon

together come under threat from hunters who have already slaughtered the once numerous desert gazelles. The novel combines pertinent ecological issues with a moving portrayal of traditional desert life and of the power of the human spirit to resist. This collection of letters chronicles the personal lives of founding father John Jay and his wife, Sarah Livingston Jay, in the tumultuous times during and after the American Revolution. The letters showcase Sarah as a devoted wife and mother, who welcomed friends and government officials into her home and helped further her husband's political career. Her intelligence, powers of observation, social skills, political savvy and more than competent management of family affairs, including finances, during her husband's frequent absences, are clearly reflected in her letters. The book includes essays on the Jay and Livingston families, family trees, a chronology of John Jay's life, and information about the character and appearance of both husband and wife. Importantly, there are bridges between the letters where necessary and essays on several topics--the mail, health and medicine, education, religion and slavery--which provide an 18th century context for the reader. The correspondence reveals the abiding love of husband and wife, their concern for their children, the dangers and difficulties of travel, descriptions of the lands they visited and events they witnessed, as well as a sense of the effort it took to survive in the era even with the buffer of wealth. Illustrations include several portraits, the signatures of John and Sarah, the Jays' wax seal and a period map of New York Harbor. NEW YORK TIMES

THE LITTLE WAY OF RUTHIE LEMING follows Rod Dreher, a Philadelphia journalist, back to his hometown of St. Francisville, Louisiana (pop. 1,700) in the wake of his younger sister Ruthie's death. When she was diagnosed at age 40 with a virulent form of cancer in 2010, Dreher was moved by the way the community he had left behind rallied around his dying sister, a schoolteacher. He was also struck by the grace and courage with which his sister dealt with the disease that eventually took her life. In Louisiana for Ruthie's funeral in the fall of 2011, Dreher began to wonder whether the ordinary life Ruthie led in their country town was in fact a path of hidden grandeur, even spiritual greatness, concealed within the modest life of a mother and teacher. In order to explore this revelation, Dreher and his wife decided to leave Philadelphia, move home to help with family responsibilities and have their three children grow up amidst the rituals that had defined his family for five generations—Mardi Gras, L.S.U. football games, and deer hunting. As David Brooks poignantly described Dreher's journey homeward in a recent New York Times column, Dreher and his wife Julie "decided to accept the limitations of small-town life in exchange for the privilege of being part of a community." There was a time when society itself was inspired by Christian principles. Art, government, society itself emulated, as much as possible, the search for perfection dictated by the call to virtue. However, Christendom's grand experiment had both peaks and troughs. Ultimately, the twentieth century's many disasters and*

Christendom's failure to stop revolution and world war have discredited Christianity itself in the eyes of many. Nevertheless, I am convinced that only Christianity can revitalize a culture that has lost most of its connection with beauty and that glorifies banality, variety, and diversity as ends in themselves. However, this would not be a retread of historical Christendom, but a new vision, predicated on the new realities of an increasingly Neopagan and Transhumanist West. Russian philosopher Ivan Ilyin puts even more bluntly: "The Gospel teaches not flight from the world, but the Christianization of the world. Thus, the sciences, the arts, politics, and the social order can all be those spiritual hands with which the Christian takes the world. And the calling of a Christian is not to chop off those hands, but to imbue their work and toil with the living spirit of Christ. Christianity has a great calling, which many do not ever realize. This purpose can be defined as the creation of a Christian culture." This book is Ivan Ilyin's attempt at a spiritual and practical handbook at creating Christian culture in an increasingly post-Christian world. Translated by Nicholas Kotar

In this beautifully wrought memoir, award-winning writer John Philip Santos weaves together dream fragments, family remembrances, and Chicano mythology, reaching back into time and place to blend the story of one Mexican family with the soul of an entire people. The story unfolds through a pageant of unforgettable family figures: from Madrina--touched with epilepsy and prophecy ever since, as a girl, she saw a dying soul leave its body--to Teofilo, who was

*kidnapped as an infant and raised by the Kikapu Indians of Northern Mexico. At the heart of the book is Santos' search for the meaning of his grandfather's suicide in San Antonio, Texas, in 1939. Part treasury of the elders, part elegy, part personal odyssey, this is an immigration tale and a haunting family story that offers a rich, magical view of Mexican-American culture. Human habitation in Colorado's San Luis Valley stretches back to distant times. Ancient peoples lived there thousands of years ago, as did the Utes, who claim the valley has been theirs forever. Others, both native peoples and Europeans, knew the valley-Don Juan de Oñate claimed the valley for King Phillip II of Spain in 1598. Consequently, the San Luis Valley has many stories, told in many voices. In this sparkling new edition of *The San Luis Valley: Land of the Six-Armed Cross*, Virginia McConnell Simmons lays before the reader the stories and voices of this multicultural land. Ranging from prehistoric peoples and historic Indians to early Spanish settlers, trappers, American explorers, railroads, and Euro-American pioneers, this book is a comprehensive volume covering the geography and social history of Colorado's San Luis Valley. New to the second edition is additional material on Hispanic culture (in particular a description of their fiber arts) and a lengthy appendix cataloging and describing all of the San Luis Valley's Hispanic place names. In addition, the notes and bibliography have been expanded, and the book contains a new introduction by David Fridtjof Halaas, Chief Historian of the Colorado Historical Society. Acclaimed as the standard history for the south-central region of Colorado, *The San Luis Valley: Land of the Six-Armed Cross* is a book for students, scholars, and others interested in the history of this fascinating and culturally rich corner of the state. A contemporary prose rendering of the great medieval French epic, *The Song of Roland* is as canonical and significant as the Anglo-Saxon *Beowulf*. It extols the chivalric ideals in the France of Charlemagne through the exploits of Charlemagne's nephew, the warrior Roland, who fights bravely to his death in a legendary battle. Against the bloody backdrop of the struggle between Christianity and Islam, *The Song of Roland* remains a vivid portrayal of medieval life, knightly adventure, and feudal politics. The first great literary works of a culture are its epic chronicles, those that create simple hero-*

figures about whom the imagination of a nation can crystallize, observed V. S. Pritchett. The Song of Roland is animated by the crusading spirit and fortified by national and religious propaganda. This edition features W. S. Merwin's glowing, lyrical translation. Entering the high-stakes business of celebrity party promotions in southern California, an ambitious young accountant finds the highly charged industry significantly shaped by big money influences, race factors, and sex. By the author of The Last Street Novel. 100,000 first printing. "Caramon must travel back and forth in time in order to save the world from his twin brother, Raistlin who has become the Master of the Tower of High Sorcery." -- The great age of European ceramic design began around 1500 and ended in the early 19th century with the introduction of large-scale production of ceramics. In this illustrated history, with nearly 300 color and black and white photos and reproductions, curator Howard Coutts considers the main stylistic trends Renaissance, Mannerism, Oriental, Rococo, and Neoclassicism as they were represented in such products as Italian Majolica, Dutch Delftware, Meissen and Sevres porcelain, Staffordshire, and Wedgwood pottery. He pays close attention to changes in eating habits over the period, particularly the layout of a formal dinner, and discusses the development of ceramics as room decoration, the transmission of images via prints, marketing of ceramics and other luxury goods, and the intellectual background to Neoclassicism. Winner of the Samuel French Morse Poetry Prize Michel Foucault examines the archeology of madness in the West from 1500 to 1800 - from the late Middle Ages, when insanity was still considered part of everyday life and fools and lunatics walked the streets freely, to the time when such people began to be considered a threat, asylums were first built, and walls were erected between the "insane" and the rest of humanity. Presents a reconstruction of the eighteenth-century empress's life that covers her efforts to engage Russia in the cultural life of Europe, her creation of the Hermitage, and her numerous scandal-free romantic affairs. Looks at the history of the American chestnut tree and how it was left on the brink of extinction from a plague and the quest to save the tree. This monograph is written within the framework of the quantum mechanical paradigm. It is modest in scope in that it is restricted to some

observations and solved illustrative problems not readily available in any of the many standard (and several excellent) texts or books with solved problems that have been written on this subject. Additionally a few more or less standard problems are included for continuity and purposes of comparison. The hope is that the points made and problems solved will give the student some additional insights and a better grasp of this fascinating but mathematically somewhat involved branch of physics. The hundred and fourteen problems discussed have intentionally been chosen to involve a minimum of technical complexity while still illustrating the consequences of the quantum-mechanical formalism. Concerning notation, useful expressions are displayed in rectangular boxes while calculational details which one may wish to skip are included in square brackets.

Beirut HARRY A. MAVROMATIS June, 1985 IX Preface to Second Edition More than five years have passed since I prepared the first edition of this mono graph. The present revised edition is more attractive in layout than its predecessor, and most, if not all of the errors in the original edition (many of which were kindly pointed out by reviewers, colleagues, and students) have now been corrected. Additionally the material in the original fourteen chapters has been extended with significant additions to Chapters 8, 13, and 14. Seeking to come to terms with the haunting memories of his childhood in the deep South, the author offers a memoir of a small-town Southern life caught up in the whirlwind of the Civil Rights movement and the KKK. 25,000 first printing. Many autobiographers share profound questions about human life with their readers—questions like: To what extent was my life imposed on me? To what extent did I bring it about through particular choices and actions, through the activity of my own will? Indeed, the issue of the will is central to autobiographical writing, and some of the greatest autobiographies give extended consideration to the will—its nature; its powers; its limitations; the forms of freedom, constraint, and expression it finds in various cultures; its role in particular human lives. In this new study, unprecedented in subject and scope, Richard Freadman offers the first sustained account of how changing theological, philosophical, and psychological accounts of the human will have been reflected in the writing of autobiography, and of how autobiography in its turn has helped shape

various understandings of the will. Early chapters trace narrative representations of the will from antiquity (the Greeks and Augustine) to postmodernism (Derrida and Barthes), with particular emphasis on late modernity's culture of the will. Later chapters then present detailed and powerfully original readings of autobiographical texts by Louis Althusser, Roland Barthes, B. F. Skinner, Ernest Hemingway, Simone de Beauvoir, Arthur Koestler, Stephen Spender, and Diana Trilling. Freadman's interdisciplinary approach to autobiography and the will includes a theoretical defense of the view that autobiographers are, in varying degrees, agents in their own texts. Threads of Life argues that late modernity has inherited deeply conflicted attitudes to the will. Freadman suggests that these attitudes, now deeply embedded in contemporary cultural discourse, need reexamining. In this, he contends, 'reflective autobiography' has an important part to play. Richard Dawkins's formulation of the meme concept in his 1976 classic The Selfish Gene has inspired three decades of work in what many see as the burgeoning science of memetics. This study is the first musicologically-orientated attempt systematically to apply the theory of memetics to music. In contrast to the two points of view normally adopted in music theory and analysis - namely those of the listener and the composer - the purpose of this book is to argue for a distinct and illuminating third perspective. The perspective is that of the (selfish) replicated musical pattern itself, and adopting it is central to memetics. An eloquent exploration of creativity, The Origins of Creativity grapples with the question of how this uniquely human expression—so central to our identity as individuals and, collectively, as a species—came about and how it has manifested itself throughout the history of our species. In this profound and lyrical book, one of our most celebrated biologists offers a sweeping examination of the relationship between the humanities and the sciences: what they offer to each other, how they can be united, and where they still fall short. Both endeavours, Edward O. Wilson reveals, have their roots in human creativity—the defining trait of our species. Reflecting on the deepest origins of language, storytelling, and art, Wilson demonstrates how creativity began not ten thousand years ago, as we have long assumed, but over one hundred thousand years ago in the Paleolithic age. Chronicling this evolution of

creativity from primate ancestors to humans, The Origins of Creativity shows how the humanities, spurred on by the invention of language, have played a largely unexamined role in defining our species. And in doing so, Wilson explores what we can learn about human nature from a surprising range of creative endeavors—the instinct to create gardens, the use of metaphors and irony in speech, and the power of music and song. Our achievements in science and the humanities, Wilson notes, make us uniquely advanced as a species, but also give us the potential to be supremely dangerous, most worryingly in our abuse of the planet. The humanities in particular suffer from a kind of anthropomorphism, encumbered by a belief that we are the only species among millions that seem to matter, yet Wilson optimistically reveals how researchers will have to address this parlous situation by pushing further into the realm of science, especially fields such as evolutionary biology, neuroscience, and anthropology. With eloquence and humanity, Wilson calls for a transformational "Third Enlightenment," in which the blending of these endeavors will give us a deeper understanding of the human condition and our crucial relationship with the natural world. "This is indeed true: if the saints and blessed collected here share one overarching characteristic it is to have put their love of God to work for their fellow men and women as they saw fit - through austerity of life, contemplative prayer, or myriad embodiments of what we would now call social work. They are holy examples to us because they lived and died for others, for us."--BOOK JACKET. Spanning some fifty-four years, The Union on Trial is a fascinating look at the journals that William Barclay Napton (1808–1883), an editor, Missouri lawyer, and state supreme court judge, kept from his time as a student at Princeton to his death in Missouri. Although a northerner by birth, Napton, the owner or trustee of forty-six slaves, viewed American society through a decidedly proslavery lens. Focusing on events between the 1850s and 1870s, especially those associated with the Civil War and Reconstruction, The Union on Trial contains Napton's political reflections, offering thoughtful and important perspectives of an educated northern-cum-southern rightist on the key issues that turned Missouri toward the South during the Civil War era. Although Napton's journals

offer provocative insights into the process of southernization on the border, their real value lies in their author's often penetrating analysis of the political, legal, and constitutional revolution that the Civil War generated. Yet the most obvious theme that emerges from Napton's journals is the centrality of slavery in Missourians' measure of themselves and the nation and, ultimately, in how border states constructed their southernness out of the tumultuous events of the era. Napton's impressions of the constitutional crises surrounding the Civil War and Reconstruction offer essential arguments with which to consider the magnitude of the nation's most transforming conflict. The book also provides a revealing look at the often intensely political nature of jurists in nineteenth-century America. A lengthy introduction contextualizes Napton's life and beliefs, assessing his transition from northerner to southerner largely as a product of his political transformation to a proslavery, states' rights Democrat but also as a result of his marriage into a slaveholding family. Napton's tragic Civil War experience was a watershed in his southern evolution, a process that mirrored his state's transformation and one that, by way of memory and politics, ultimately defined both. Students and scholars of American history, Missouri history, and the Civil War will find this volume indispensable reading. An assortment of 140 recipes for classic Cantonese family dishes is accompanied by an introduction to the philosophy and principles of Chinese cuisine, and advice on the techniques of Chinese cooking

The story of the history-making meeting between scorned master composer Johann Sebastian Bach and Prussia's Frederick the Great discusses Frederick's abuse-marked upbringing, his challenge to Bach to improvise an intricate fugue, and their clashes about faith as they reflected the Reformation and Enlightenment periods. 30,000 first printing. What happens when a former Zen Buddhist monk and his feminist wife experience an apparition of the Virgin Mary? "This book could not have come at a more auspicious time, and the message is mystical perfection, not to mention a courageous one. I adore this book."—Caroline Myss, author of Anatomy of the Spirit Before a vision of a mysterious "Lady" invited Clark Strand and Perdita Finn to pray the rosary, they were not only uninterested in becoming Catholic but finished with institutional religion altogether. Their main spiritual concerns

were the fate of the planet and the future of their children and grandchildren in an age of ecological collapse. But this Lady barely even referred to the Church and its proscriptions. Instead, she spoke of the miraculous power of the rosary to transform lives and heal the planet, and revealed the secrets she had hidden within the rosary's prayers and mysteries—secrets of a past age when forests were the only cathedrals and people wove rose garlands for a Mother whose loving presence was as close as the ground beneath their feet. She told Strand and Finn: *The rosary is My body, and My body is the body of the world. Your body is one with that body. What cause could there be for fear? Weaving together their own remarkable story of how they came to the rosary, their discoveries about the eco-feminist wisdom at the heart of this ancient devotion, and the life-changing revelations of the Lady herself, the authors reveal an ancestral path—available to everyone, religious or not—that returns us to the powerful healing rhythms of the natural world.* Mary C. Sullivan, R.S.M., is Professor Emerita of Language and Literature, and Dean Emerita of the College of Liberal Arts, at the Rochester Institute of Technology. How does economic development affect women in Latin America? This work examines the different ways that economic and social relations between the sexes are redefined in Guatemala as capitalist expansion transforms the nation. An unusual and rich combination of fieldwork in four communities supplemented by national-level data shows there are major differences in the sexual division of labor in four major segments of Guatemalan society: the Maya peasantry, the plantations, the urban poor, and the middle class. Without losing sight of the role of each community within the national economy, local economic and social options are described to show how economic change alters women's status relative to men's. The treatment of these differences goes beyond quantitative summaries to include life histories illustrating the complex choices women make and their adaptive strategies. The importance of cultural, class, and regional differences are brought to bear on the interpretation of different patterns of male-female relations, while local community adaptations are set*

against the larger background of capitalist expansion in Latin America. This book provides a unique contribution to the literature of Mesoamerican communities in that it redresses the imbalance in community-level coverage of women's economic and social position within the Maya population, and it provides data on several types of communities that have scarcely been covered by anthropologists working in Mesoamerica. The comparative material on Maya and Ladino, rural and urban, and the poor and the elite is used to advance the theoretical understanding of the changing causes of women's subordination in the Third World. Rejecting conventional explanations of machismo and traditional culture as cause of male dominance, this work explores the multi-faceted effects of the larger capitalist system on sexual stratification.
