Enzo Ferrari wanted this compact mid-engined coupe to qualify as a GT car for world championship racing. The FIA, motor sport's rule-makers, disagreed and this new model, of which just 32 were made, was forced to run as a sports-prototype in 1964 and 1965. To everyone's surprise, the LM was to dominate the Le Mans 24 Hour race in 1965. 6313, entered by Ecurie Francorchamps, led for much of the race and finished second after a tyre failure in the closing stages. It was the high-spot of a busy season for a car that, 54 years later, is well-known as a successful contender in historic car racing. Ecurie Francorchamps, which fielded its cars in bright yellow Belgian racing colours, was one of the most loyal and successful private Ferrari teams. 6313 was its third 250 LM and one of the last to be built. It was driven at Le Mans in 1965 by Pierre Dumay and Gustave Gosselin, and led the race through Saturday night and Sunday morning, only to suffer a tyre blow-out with less than three hours to the finish, allowing the NART 250 LM of Jochen Rindt and Masten Gregory to take victory. For many years the identity of 6313 was confused with its teammate 6023. Detective work by Ferrari specialist Keith

Bluemel, consultant on this book, clarified the situation. This book unravels the mystery. The book is profusely illustrated with period photographs and documents, and a gallery of studio photographs of the car as it is today. There were many reasons for this success, but perhaps the most important was that Mercedes expanded the range to include a simply vast amount of variants including four-cylinder and six-cylinder petrol engines, four-cylinder diesels; saloons, coupes and long-wheelbase models.
