There is certainly color galore, texture that you can "feel," and embellishments aplenty. Whatever the style, Magenta projects are built around simple, classic compositions. A card may be straightforward and symmetrical, the design centered on the page, or that same symmetric design may be shifted off-center to create an intriguing pattern. But there is always an unmistakable focal point that, with the addition of rich color and stunning embellishments, results in a grand surprise that delights the senses. This is the essence of Magenta, and the reason why Magenta materials and techniques are favored by paper crafters all over the world. Magenta Style Paper Enchantments presents more than 70 projects that will inspire you to play with color, texture, and embellishments. 20 main projects offering various techniques are accompanied by a materials list and photographic step-by-step instructions, and the others appear in gallery sections in each of the 4 chapters. Nathalie Metivier and Leslie Carola show you techniques like rubber stamping and coloring with a variety of media; embossing and debossing with ink; creating texture with Peel Off's stickers; making three-dimensional constructions; and decorating holiday ornaments and other tabletop items. Try the projects as they are. Then change the palette, shift the focal point, play with the details, find the art of the craft--Magenta Style. Hands-on, structured activities give students strategies for evaluating the credibility of sources, detecting fake news, understanding bias, and more. Readings and writing prompts support specific concepts, including how to craft a research question and effectively conduct searches. An appendix contains three sample lesson plans. Seven editions and more than nine million copies

later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, *A Manual for Writers* remains the essential resource for students and their teachers.

When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. A Manual for Writers of Research Papers, Theses, and Dissertations--also known as "Turabian"--remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released Chicago Manual of Style, 17th edition, as well as with the latest edition of The Craft of Research. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. A Manual for Writers also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, A Manual for Writers has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines. Designed specifically for undergraduate writing, this easy-to-use pocket guide provides complete guidance for new writers on effective, clear, and inclusive scholarly communication and the essentials of formatting papers and other course assignments.
