Hoarding disorder is the excessive saving of objects and difficulty parting with them to a point that interferes with one's ability to properly use rooms and furnishings in the home. Hoarding can become dangerous, sometimes resulting in structural problems and fires, or in hazardous

sanitary conditions. Studies indicate that around one in every 25 people suffers from hoarding. This means that almost all of us know someone who hoards. *Hoarding: What Everyone Needs to Know®* demystifies this complex problem, what it looks like and why it may develop, and how it can be treated. With their combined expertise in psychological treatments for hoarding and community interventions, Drs. Steketee and Bratiliotis explain how to understand hoarding as a mental illness, describing the disorder in layman's terms and explaining the various facets and manifestations of the behavior. Chapters focus on one or more common questions regarding diagnosis, features, how to assess severity, and treatment. The book will dispel myths and help readers identify hoarding that touches their own lives. As such it will be of great value not only to those who suspect a loved one may be hoarding, but also to first responders, such as firefighters, public health officials, and housing and social service personnel, who will find here an essential resource for use in the field.

In April 1861, brothers Daniel and Pressley Boyd left their farm in Abbeville County, South Carolina, to join the Confederate army. The Civil War soon swept their other brothers, William, Thomas and Andrew, as well as brother-in-law Fenton Hall into service. By the war's end, only Daniel survived. The extensive collection of letters the Boyds left behind, assembled for the first time, details their experiences across almost every theater of the war and offers commentary on many aspects of soldier life—from illness, death, and religion to friendly fire, desertion, and politics. Few families sacrificed so much to the Confederate cause as the Boyds.

The history of a rural village in Northwest, Wisconsin. Luck is known as the home of the Duncan Yo-Yo company from the 1940s - 1960s. It is a Danish community in a rural, lake filled part of Wisconsin, an hour NW of Minneapolis and St Paul MN.

Recent breakthroughs in the synthesis of diamond have led to increased availability at lower cost. This has spurred R&D into its characterization and application in machine tools, optical coatings, X-ray windows and light-emitting optoelectronic devices. In the longer term, diamond's high thermal conductivity and electron mobility make it potentially useful for integrated circuit applications (e.g. in heat sinks). This book draws together expertise from some 60 researchers in the United States and Europe working on bulk and thin film diamond. All fully refereed, the contributions are combined to form a highly structured volume with reviews, evaluations, tables and illustrative

material, together with expert guidance to the literature. This book revives the discussion on public social services and their redesign, with a focus on services relating to care and the social inclusion of vulnerable groups, providing rich information on the changes that occurred in the organisation and supply of public social services over the last thirty years in different European places and service fields. Despite the persisting variety in social service models, three shared trends emerge: public sector disengagement, 'vertical re-scaling' of authority and 'horizontal re-mix' in the supply system. The consequences of such changes are evaluated from different perspectives – governance, social and territorial cohesion, labour market, gender – and are eventually deemed 'disruptive' in both economic and social terms. The policy implications of the restructuring are also explored. This title will be Open Access on Elgaronline.com. Containing decisions of the regulatory commissions and of state and federal courts. First Published in 2000. Routledge is an imprint of Taylor & Francis, an informa company.
